

Juvenile Court **Statistics**

2014

Online resources

National Center for Juvenile Justice

ncjj.org

NCJJ's web site describes its research activities, services, and publications, featuring links to project-supported sites and data resources, including OJJDP's Statistical Briefing Book, the National Juvenile Court Data Archive, and the MacArthur Foundation's Juvenile Justice Geography, Policy, Practice & Statistics web site.

National Juvenile Court Data Archive ojjdp.gov/ojstatbb/njcda

The annual *Juvenile Court Statistics* report series is one of many products supported by the National Juvenile Court Data Archive. To learn more, visit the Archive web site.

- ◆ The Archive web site was developed to inform researchers about data sets housed in the National Juvenile Court Data Archive and the procedures for access and use of these data. Visitors can view variable lists and download user guides to the data sets. The site also includes links to publications based on analyses of Archive data.
- ▶ Easy Access to Juvenile Court Statistics is an interactive web-based application that allows users to analyze the actual databases that are used to produce the Juvenile Court Statistics report. Users have access to national estimates on more than 40 million delinquency cases processed by the nation's juvenile courts between 1985 and 2014 and can explore trends of and relationships among a youth's demographics and referral offenses, and the court's detention, adjudication, and disposition decisions. Results of analyses can be saved and imported into spreadsheet and word processing software. Users can also view preformatted tables describing the demographic characteristics of youth involved in the juvenile justice system and how juvenile courts process these cases. This application is available from the "Products & Publications" section on the Archive web site.
- ◆ Easy Access to State and County Juvenile Court Case Counts gives users quick access to multiple years of state and county juvenile court case counts for delinquency, status offense, and dependency cases. This application is available from the "Products & Publications" section on the Archive web site.

OJJDP's Statistical Briefing Book

ojjdp.gov/ojstatbb

The Briefing Book is a comprehensive online resource describing various topics related to delinquency and the juvenile justice system, including the latest information on juveniles living in poverty, teen birth rates, juvenile victims of violent crime, trends in juvenile arrest rates, and youth in residential placement facilities. The Briefing Book is also a repository for more detailed presentations of juvenile court data than are found in the annual *Juvenile Court Statistics* report.

- ◆ Under the "Juveniles in Court" section of the Statistical Briefing Book users will find the latest statistical information on trends in the volume of cases handled by the nation's juvenile courts and the court's response (e.g., detention, adjudication, and disposition decisions) to these cases. Juvenile court data are displayed in an easy-to-read, ready-to-use format, using tables and graphs.
- The Briefing Book's "Juveniles in Court" section includes an interactive tool that describes how specific types of delinquency cases typically flow through the juvenile justice system. Annual summaries are available from 1985 to present for more than 25 offense categories, and include separate presentations by gender, age, and race.

Juvenile Court Statistics 2014

Anthony Sladky, Senior Computer Programmer

Jason Smith, Computer Programmer

Nancy Tierney, Program Manager

Samantha Zaleski, Research Assistant

Juvenile Court Statistics would not be possible were it not for the state and local agencies that take the time each year to honor our requests for data and documentation. The following agencies contributed case-level data or court-level aggregate statistics for this report:

Alabama—State of Alabama, Administrative Office of the Courts.

Alaska—Alaska Division of Juvenile Justice.

Arizona—Supreme Court, State of Arizona, Administrative Office of the Courts.

Arkansas—Administrative Office of the Courts, State of Arkansas.

California—California Department of Justice, Criminal Justice Statistics Center.

Colorado Judicial Branch.

Connecticut—Judicial Branch Administration, Court Support Services and Court Operations Divisions.

Delaware—Delaware Family Court, Administrative Office of the Courts.

District of Columbia—Superior Court of the District of Columbia.

Florida—State of Florida Department of Juvenile Justice.

Georgia—Judicial Council of Georgia Administrative Office of the Courts.

Hawaii—Family Court of the First Circuit, The Judiciary, State of Hawaii.

Idaho—Idaho Supreme Court.

Illinois—Administrative Office of the Illinois Courts, Probation Services Division; and Juvenile Court of Cook County.

Indiana—Supreme Court of Indiana, Division of State Court Administration.

Iowa—Iowa Division of Criminal and Juvenile Justice Planning.

Kansas—Supreme Court of Kansas, Office of Judicial Administration.

Kentucky—Kentucky Administrative Office of the Courts.

Maryland—Department of Juvenile Services.

Massachusetts—Administrative Office of the Courts.

Michigan—State Court Administrative Office, Michigan Supreme Court.

Minnesota—Minnesota Supreme Court.

Mississippi—Mississippi Department of Human Services.

Missouri—Office of State Court Administrator.

Montana—Office of State Court Administrator, Youth Court Services.

Nebraska—Nebraska Crime Commission.

Nevada—Division of Child and Family Services, Juvenile Justice Programs Office.

New Jersey—Administrative Office of the Courts.

New Mexico—Children, Youth and Families Department.

New York—Office of Court Administration; and Division of Criminal Justice Services.

North Carolina—North Carolina Department of Juvenile Justice and Delinquency Prevention.

North Dakota—North Dakota Supreme Court, State Court Administrator's Office.

Ohio—Supreme Court of Ohio; Cuyahoga County Juvenile Court Division; Franklin County Court of Common Pleas; and Hamilton County Juvenile Court.

Oklahoma—Oklahoma Office of Juvenile Affairs.

Oregon—Oregon Youth Authority.

Pennsylvania—Juvenile Court Judges' Commission.

Rhode Island—Rhode Island Family Court

South Carolina—Department of Juvenile Justice.

South Dakota—Unified Judicial System.

Tennessee—Tennessee Council of Juvenile and Family Court Judges.

Texas—Texas Juvenile Justice Department.

Utah—Utah Administrative Office of the Courts.

Vermont—Vermont Court Administrator's Office.

Virginia—Department of Juvenile Justice; and Virginia Supreme Court.

Washington—Office of the Administrator for the Courts.

West Virginia—West Virginia Supreme Court of Appeals Administrative Office, Court Services Division.

Wisconsin—Supreme Court of Wisconsin.

Preface

Juvenile Court Statistics 2014 describes delinquency cases and petitioned status offense cases handled between 2005 and 2014 by U.S. courts with iuvenile jurisdiction. National estimates of juvenile court delinquency caseloads in 2014 were based on analyses of 691,687 automated case records and court-level statistics summarizing an additional 38,591 cases. Estimates of status offense cases formally processed by juvenile courts in 2014 were based on analyses of 67,978 automated case-level records and court-level summary statistics on an additional 4,264 cases. The data used in the analyses were contributed to the National Juvenile Court Data Archive (the Archive) by more than 2,400 courts with jurisdiction over 84% of the juvenile population in 2014.

The first Juvenile Court Statistics report was published in 1929 by the U.S. Department of Labor and described cases handled by 42 courts during 1927. During the next decade, Juvenile Court Statistics reports were based on statistics cards completed for each delinquency, status offense, and dependency case handled by the courts participating in the reporting series. The Children's Bureau (within the U.S. Department of Labor) tabulated the information on each card, including age, gender, and race of the juvenile; the reason for referral; the

manner of dealing with the case; and the final disposition of the case. During the 1940s, however, the collection of case-level data was abandoned because of its high cost. From the 1940s until the mid-1970s, *Juvenile Court Statistics* reports were based on simple, annual case counts reported to the Children's Bureau by participating courts.

In 1957, the Children's Bureau initiated a new data collection design that enabled the Juvenile Court Statistics series to develop statistically sound national estimates. The Children's Bureau, which had been transferred to the U.S. Department of Health, Education, and Welfare (HEW), developed a probability sample of more than 500 courts. Each court in the sample was asked to submit annual counts of delinguency, status offense, and dependency cases. This approach, though, proved difficult to sustain as courts began to drop out of the sample. At the same time, a growing number of courts outside the sample began to compile comparable statistics. By the late 1960s, HEW ended the samplebased effort and returned to the policy of collecting annual case counts from any court able to provide them. The Juvenile Court Statistics series, however, continued to generate national estimates based on data from these nonprobability samples.

The Office of Juvenile Justice and Delinquency Prevention (OJJDP) became responsible for *Juvenile Court Statistics* following the passage of the Juvenile Justice and Delinquency Prevention Act of 1974. In 1975, OJJDP awarded the National Center for Juvenile Justice (NCJJ) a grant to continue the report series. Although NCJJ agreed to use procedures established by HEW to ensure reporting continuity, NCJJ also began to investigate methods of improving the quality and detail of national statistics. A critical

innovation was made possible by the proliferation of computers during the 1970s. As NCJJ asked agencies across the country to complete the annual juvenile court statistics form, some agencies began offering to send the detailed, automated case-level data collected by their management information systems. NCJJ learned to combine these automated records to produce a detailed national portrait of juvenile court activity—returning to the original objective of the *Juvenile Court Statistics* series.

The project's transition from using annual case counts to analyzing automated case-level data was completed with the production of *Juvenile Court Statistics 1984*. For the first time since the 1930s, *Juvenile Court Statistics* contained detailed case-level descriptions of the delinquency and status offense cases handled by U.S. juvenile courts. This case-level detail continues to be the emphasis of the reporting series.

Chapter 1

Introduction

This report describes delinquency and status offense cases handled between 2005 and 2014 by U.S. courts with juvenile jurisdiction. Courts with juvenile jurisdiction may handle a variety of matters, including child maltreatment, traffic violations, child support, and adoptions. This report focuses on cases involving juveniles charged with law violations (delinquency or status offenses).

Unit of Count

In measuring the activity of juvenile courts, one could count the number of offenses referred; the number of cases referred; the actual filings of offenses, cases, or petitions; the number of disposition hearings; or the number of juveniles handled. Each "unit of count" has its own merits and disadvantages. The unit of count used in *Juvenile Court Statistics (JCS)* is the number of "cases disposed."

A "case" represents a juvenile processed by a juvenile court on a new referral, regardless of the number of law violations contained in the referral. A juvenile charged with four burglaries in a single referral would represent a single case. A juvenile referred for three burglaries and referred again the following week on another burglary charge would represent two cases, even if the court

eventually merged the two referrals for more efficient processing.

The fact that a case is "disposed" means that a definite action was taken as the result of the referral—i.e., a plan of treatment was selected or initiated. It does not necessarily mean that a case was closed or terminated in the sense that all contact between the court and the juvenile ceased. For example, a case is considered to be disposed when the court orders probation, not when a term of probation supervision is completed.

Coverage

A basic question for this reporting series is what constitutes a referral to juvenile court. The answer depends partly on how each jurisdiction organizes its case-screening function. In many communities, an intake unit within the juvenile court first screens all juvenile matters. The intake unit determines whether the matter should be handled informally (i.e., diverted) or petitioned for formal handling. In data files from communities using this type of system, a delinquency or status offense case is defined as a court referral at the point of initial screening, regardless of whether it is handled formally or informally.

In other communities, the juvenile court is not involved in delinquency or status offense matters until another agency (e.g., the prosecutor's office or a social service agency) has first screened the case. In other words, the intake function is performed outside the court, and some matters are diverted to other agencies without the court ever handling them. Status offense cases, in particular, tend to be diverted from court processing in this manner.

Since its inception, Juvenile Court Statistics has adapted to the changing structure of juvenile court processing nationwide. As court processing became more diverse, the JCS series broadened its definition of the juvenile court to incorporate other agencies that perform what can generically be considered juvenile court functions. In some communities, data collection has expanded to include departments of youth services, child welfare agencies, and prosecutors' offices. In other communities, this expansion has not been possible. Therefore, while there is extensive data coverage in the JCS series of formally handled delinquency cases and adequate data coverage of informally handled delinquency cases and formally handled status offense cases, the data coverage of informally handled status offense cases is limited and is not sufficient to support the generation of national estimates. For this reason, JCS reports do not present any information on informally handled status offense cases. (Sub-national analyses of these cases are available from the National Juvenile Court Data Archive [the Archive].)

Juvenile Court Processing

Any attempt to describe juvenile court caseloads at the national level must be based on a generic model of court processing to serve as a common framework. In order to analyze and present data about juvenile court activities in diverse jurisdictions, the

Archive strives to fit the processing characteristics of all jurisdictions into the following general model:

Intake. An intake department (either within or outside the court) first screens referred cases. The intake department may decide to dismiss the case for lack of legal sufficiency or to resolve the matter formally or informally. Informal (i.e., nonpetitioned) dispositions may include a voluntary referral to a social service agency, informal probation, or the payment of fines or some form of voluntary restitution. Formally handled cases are petitioned and scheduled in court for an adjudicatory or waiver hearing.

Judicial Waiver. The intake department may decide that a case should be removed from juvenile court and handled instead in criminal (adult) court. In such cases, a petition is usually filed in juvenile court asking the juvenile court judge to waive juvenile court jurisdiction over the case. The juvenile court judge decides whether the case merits criminal prosecution. When a waiver request is denied, the matter is usually then scheduled for an adjudicatory hearing in the juvenile court.

Petitioning. If the intake department decides that a case should be handled formally within the juvenile court, a petition is filed and the case is placed on the court calendar (or docket) for an adjudicatory hearing. A small number of petitions are dismissed for various reasons before an adjudicatory hearing is actually held.

Adjudication. At the adjudicatory hearing, a juvenile may be adjudicated (judged) a delinquent or status offender, and the case would then proceed to a disposition hearing. Alternatively, a case can be dismissed or continued in contemplation of dismissal. In these cases, the court often recommends that the juvenile take some actions prior to the final adjudication decision, such as paying restitution or voluntarily attending drug counseling.

Disposition. At the disposition hearing, the juvenile court judge determines the most appropriate sanction, generally after reviewing a predisposition report prepared by a probation department. The range of options available to a court typically includes commitment to an institution; placement in a group home or other residential facility or perhaps in a foster home; probation (either regular or intensive supervision); referral to an outside agency, day treatment, or mental health program; or imposition of a fine, community service, or restitution. Disposition orders often involve multiple sanctions and/or conditions. Review hearings are held to monitor the juvenile's progress. Dispositions may be modified as a result. This report includes only the most severe initial disposition in each case.

Detention. A juvenile may be placed in a detention facility at different points as a case progresses through the juvenile justice system. Detention practices also vary from jurisdiction to jurisdiction. A judicial decision to detain or continue detention may occur before or after adjudication or disposition. This report includes only those detention actions that result in a juvenile being placed in a restrictive facility under court authority while awaiting the outcome of the court process. This report does not include detention decisions made by law enforcement officials prior to court intake or those occurring after the disposition of a

¹Mechanisms of transfer to criminal court vary by state. In some states, a prosecutor has the authority to file juvenile cases directly in criminal court if they meet specified criteria. This report, however, includes only cases that were initially under juvenile court jurisdiction and were transferred as a result of judicial waiver.

case (e.g., temporary holding of a juvenile in a detention facility while awaiting court-ordered placement elsewhere).

Data Quality

Juvenile Court Statistics relies on the secondary analysis of data originally compiled by juvenile courts or juvenile justice agencies to meet their own information and reporting needs. Although these incoming data files are not uniform across jurisdictions, they are likely to be more detailed and accurate than data files compiled by local jurisdictions merely complying with a mandated national reporting program.

The heterogeneity of the contributed data files greatly increases the complexity of the Archive's data processing tasks. Contributing jurisdictions collect and report information using their own definitions and coding categories. Therefore, the detail reported in some data sets is not contained in others. Even when similar data elements are used, they may have inconsistent definitions or overlapping coding categories. The Archive restructures contributed data into standardized coding categories in order to combine information from multiple sources. The standardization process requires an intimate understanding of the development, structure, and content of each data set received. Codebooks and operation manuals are studied, data providers interviewed, and data files analyzed to maximize the understanding of each information system. Every attempt is made to ensure that only compatible information from the various data sets is used in the standardized data files.

While the heterogeneity of the data adds complexity to the development of a national data file, it has proven to be valuable in other ways. The diversity of the data stored in the National Juvenile Court Data Archive enables the data to support a wider range of

research efforts than would a uniform, and probably more general, data collection form. For example, the Federal Bureau of Investigation's (FBI's) Uniform Crime Reporting (UCR) Program is limited by necessity to a small number of relatively broad offense codes. The UCR offense code for larceny-theft combines shoplifting with a number of other larcenies. Thus, the data are useless for studies of shoplifting. In comparison, many of the Archive's data sets are sufficiently detailed to enable a researcher to distinguish offenses that are often combined in other reporting series shoplifting can be distinguished from other larcenies, joyriding from motor vehicle theft, and armed robbery from unarmed robbery. The diversity of these coding structures allows researchers to construct data sets that contain the detail demanded by their research designs.

Validity of the Estimates

The national delinquency and status offense estimates presented in this report were generated with data from a large nonprobability sample of juvenile courts. Therefore, statistical confidence in the estimates cannot be mathematically determined. Although statistical confidence would be greater if a probability sampling design were used, the cost of such an effort has long been considered prohibitive. Secondary analysis of available data is the best practical alternative for developing an understanding of the nation's juvenile courts.

National estimates of delinquency cases for 2014 are based on analyses of individual case records from more than 2,200 courts and aggregate court-level data on cases from more than 200 additional courts. Together, these courts had jurisdiction over 84% of the U.S. juvenile population in 2014. National estimates of petitioned status offense cases for 2014 are based on case records from more than 2,100 courts and court-level data from 159 additional courts, covering

78% of the juvenile population. The imputation and weighting procedures that generate national estimates from these samples control for many factors: the size of a community, the age and race composition of its juvenile population, the volume of cases referred to the reporting courts, the age and race of the juveniles involved, the offense characteristics of the cases, the courts' responses to the cases (manner of handling, detention, adjudication, and disposition), and the nature of each court's jurisdictional responsibilities (i.e., upper age of original jurisdiction).

With each annual release of data, estimates for prior years are revised and replaced. There are two primary reasons for this. First, data submissions from contributing jurisdictions, particularly case-level data submissions, can change as newer data files submitted to the Archive replace previously submitted files. Second, the estimation procedure used by the Archive utilizes county level population estimates, which are revised by the Census Bureau each year. Therefore, readers should not compare estimates from Juvenile Court Statistics reports produced in different years, but should compare estimates across trending years within a Juvenile Court Statistics report.

Structure of the Report

Chapters 2 and 3 of this report present national estimates of delinquency cases handled by the juvenile courts in 2014 and analyze caseload trends since 2005. Chapter 2 describes the volume and rate of delinquency cases, demographic characteristics of the juveniles involved (age, gender, and race), and offenses charged. Chapter 3 traces the flow of delinquency cases from referral to court through court processing, examining each decision point (i.e., detention, intake decision, adjudication decision, and judicial disposition), and presenting data by demographic characteristics and offense. Together,

these two chapters provide a detailed national portrait of delinquency cases

Chapter 4 presents national estimates of status offense cases formally handled by the juvenile courts in 2014 and caseload trends since 2005. It includes data on demographic characteristics, offenses charged, and case processing.

Appendix A describes the statistical procedure used to generate these estimates. Readers are encouraged to consult appendix B for definitions of key terms used throughout the report. Few terms in the field of juvenile justice have widely accepted definitions. The terminology used in this report has been carefully developed to communicate the findings of the work as precisely as possible without sacrificing applicability to multiple jurisdictions.

This report uses a format that combines tables, figures, and text highlights for presentation of the data. A detailed index of tables and figures appears at the end of the report.

Data Access

The data used in this report are stored in the National Juvenile Court Data Archive at the National Center for Juvenile Justice (NCJJ) in Pittsburgh, PA. The Archive contains the most detailed information available on juveniles involved in the juvenile justice system and on the activities of U.S. juvenile courts. Designed to facilitate research on the juvenile justice system, the Archive's data files are available to policymakers, researchers, and students. In addition to national data files, state and local data can be provided to researchers. With the assistance of Archive staff, researchers can merge selected files for cross-jurisdictional and longitudinal analyses. Upon request, project staff is also available to perform special analyses of the Archive's data files.

Researchers are encouraged to explore the National Juvenile Court Data Archive web site at ojjdp.gov/ojstatbb/njcda/ for a summary of Archive holdings and procedures for data access. Researchers may also contact the Archive directly at 412–246-0833.

Changes Introduced in This Report

Readers may notice two changes in this report. The first involves a change to the presentation of race. Prior *Juvenile Court Statistics* reports used four race categories: white, black, American Indian/Alaska Native, and Asian/Pacific Islander (including Native Hawaiian). Beginning with this report, displays of race data will include Hispanic as a fifth category.

In 2003, modifications to federal standards for race and ethnicity classification in federal data were to take effect. The Archive has collected data from state and local data systems, but those systems were often slow to adopt the federal standard. So until now, the Archive was not able to incorporate detail on youth's ethnicity into its national estimates. However, the number of jurisdictions that report ethnicity data consistently over time is now sufficient to allow Hispanic ethnicity to be incorporated into the development of the Archive's national estimates.

Jurisdictions that submitted detailed delinquency data to the Archive that included Hispanic race information represented 85% of the Hispanic youth population at risk of court involvement in 2014 and averaged 85% over the 2005–2014 period. Similarly, jurisdictions that submitted detailed petitioned status offense data that included Hispanic race information represented 79% of the Hispanic youth population at risk in 2014 and averaged 81% over the 2005–2014 period. Throughout this report, Hispanic ethnicity is handled as though it were a race category. Therefore, all other race categories

exclude Hispanic youth. For brevity, the term Hispanic is used throughout this report to refer to Hispanic or Latino youth.

The second change to this report involves the presentation of trend data. For the most part, the presentation of trends is restricted to the 10 years from 2005 through 2014. This change stems from the inclusion of estimates of cases involving Hispanic youth for the first time. Prior to 2005 data, there was insufficient data to support including Hispanic detail. This change also helps telescope comparisons to the recent past rather than the long-ago past when juvenile violence and court delinquency caseloads were at their peak. Readers interested in juvenile court estimates for years prior to 2005 should refer to Juvenile Court Statistics 2013 or contact NCJJ.

Other Sources of Juvenile Court Data

With support from OJJDP, NCJJ has developed two web-based data analysis and dissemination applications that provide access to the data used for this report. The first of these applications, Easy Access to Juvenile Court Statistics 1985-2014, was developed to facilitate independent analysis of the national delinquency estimates presented in this report while eliminating the need for statistical analysis software. It also enables users to view preformatted tables, beyond those included in this report, describing the demographic characteristics of youth involved in the juvenile justice system and how juvenile courts process these cases. The second application, Easy Access to State and County Juvenile Court Case Counts, presents annual counts of the delinquency, status offense, and dependency cases processed in juvenile courts, by state and county. These applications are available from OJJDP's Statistical Briefing Book at ojjdp.gov/ojstatbb.

Chapter 2

National Estimates of Delinquency Cases

Delinquency offenses are acts committed by juveniles that, if committed by an adult, could result in criminal prosecution. This chapter documents the volume of delinquency cases referred to juvenile court and examines the characteristics of these cases, including types of offenses charged and demographic characteristics of the juveniles involved (age, gender, and race).

Analysis of case rates permits comparisons of juvenile court activity over time while controlling for differences in the size and demographic characteristics of the juvenile population. Rates are calculated as the number of cases for every 1,000 juveniles in the population—those age 10 or older who were under the jurisdiction of a juvenile court.¹

The chapter focuses on cases disposed in 2014 and examines trends since 2005.

¹ The upper age of juvenile court jurisdiction is defined by statute in each state. See appendix B, the "Glossary of Terms," for a more detailed discussion on the upper age of juvenile court jurisdiction. Case rates presented in this report control for state variations in juvenile population.

Counts and Trends

- In 2014, courts with juvenile jurisdiction handled an estimated 975,000 delinquency cases.
- In 1960, approximately 1,100 delinquency cases were processed daily. In 2014, juvenile courts handled about 2,700 delinquency cases per day.
- The number of delinquency cases processed by juvenile courts decreased 42% in the 10 years between 2005 and 2014.
- Between 2005 and 2014, the number of cases decreased for all offense categories: property 46%, public order 44%, person 40%, and drugs 30%.

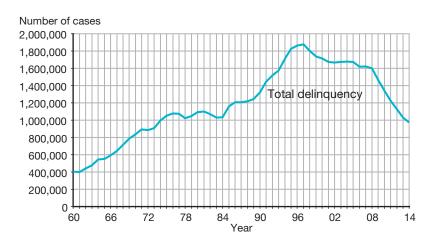

Offense profile of delinquency cases:

Most serious		
offense	2005	2014
Person	26%	27%
Property	37	34
Drugs	11	13
Public order	26	26
Total	100%	100%

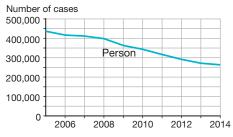

Note: Detail may not total 100% because of rounding.

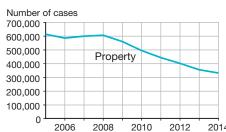

The offense profile of the court's delinquency caseload was similar in 2005 and 2014.

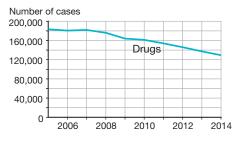

Between 1960 and 2014, juvenile court delinquency caseloads more than doubled (141%)

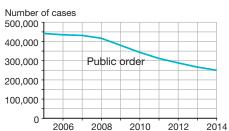

Delinquency caseloads for all offense groups were at their lowest level in 2014

Counts and Trends

In the last 10 years (2005–2014), the number of cases handled by juvenile courts has decreased for all offenses

		F	Percent chang	е
Most serious offense	Number of cases 2014	10 year 2005– 2014	5 year 2010– 2014	1 year 2013– 2014
Total delinquency	974,900	-42%	-27%	-5%
Total person	262,800	-40	-23	-3
Violent Crime Index*	57,100	-36	-22	0

Simple assault	173,400	-39	-23	-4
Other violent sex offenses	7,700	-34	-13	-5
Other person offenses	24,600	- 51	-31	-3
Total property	333,500	-46	-33	-6
Property Crime Index**	242,200	-42	- 31	-6
Burglary	59,500	-42	-31	-6
Larceny-theft	166,800	-40	-31	-6
Motor vehicle theft	12,000	-63	-23	5
Arson	4,000	- 51	-25	- 7
Vandalism	48,400	-53	-38	-8
Trespassing	26,500	-50	-38	-8
Stolen property offenses	9,700	– 51	-30	-3
Other property offenses	6,700	-62	-29	-6
Drug law violations	128,900	-30	-20	-6
Public order offenses	249,700	-44	-27	- 7
Obstruction of justice	128,200	-36	- 21	-2
Disorderly conduct	65,000	– 51	- 35	-11
Weapons offenses	20,200	-52	-29	-13
Liquor law violations	5,900	-62	- 58	-16
Nonviolent sex offenses	10,800	-22	-6	3
Other public order offenses	19,700	- 51	-28	-12

^{*} Includes criminal homicide, forcible rape, robbery, and aggravated assault.

Note: Detail may not add to totals because of rounding. Percent change calculations are based on unrounded numbers.

- Between 2005 and 2014, offenses with the largest percentage decrease in caseloads included motor vehicle theft (63%) and liquor law violations (62%).
- Trends in juvenile court cases paralleled trends in arrests of persons younger than 18. The number of juvenile court cases involving offenses included in the FBI's Violent Crime Index² (criminal homicide, forcible rape, robbery, and aggravated assault) did not change between 2013 and 2014. The FBI reported that the number of arrests involving persons younger than age 18 charged with Violent Crime Index offenses dropped 4% during this same period.
- Between 2013 and 2014, the volume of juvenile court cases involving Property Crime Index offenses (burglary, larceny-theft, motor vehicle theft, and arson) declined 6%, and the FBI reported that arrests of persons under age 18 for Property Crime Index offenses decreased 6%.

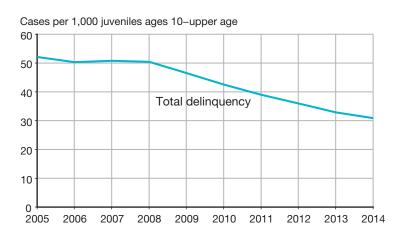

^{**} Includes burglary, larceny-theft, motor vehicle theft, and arson.

² The annual series of reports from the FBI, *Crime in the United States*, provides information on arrests in offense categories that have become part of the common vocabulary of criminal justice statistics. The *Crime in the United States* series tracks changes in the general nature of arrests through the use of two indexes, the Violent Crime Index and the Property Crime Index. Although they do not contain all violent or all property offenses, the indexes serve as a barometer of criminal activity in the United States. The arrest trends reported above are from *Crime in the United States 2014*, Table 36.

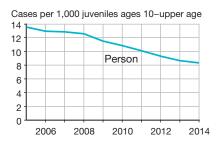

Case Rates

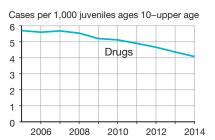

- More than 31 million youth were under juvenile court jurisdiction in 2014. Of these youth, 79% were between the ages of 10 and 15, 12% were age 16, and 9% were age 17. The small proportion of 16- and 17-year-olds among the juvenile court population is related to the upper age of juvenile court jurisdiction, which varies by state. In 2014, youth age 16 in 2 states were under the original jurisdiction of the criminal court, as were youth age 17 in an additional 8 states.
- In 2014, juvenile courts processed 30.9 delinquency cases for every 1,000 juveniles in the population—those age 10 or older who were under the jurisdiction of a juvenile court.
- The total delinquency case rate remained stable between 2005 and 2008 and then declined 39% to the 2014 level. As a result, the overall delinquency case rate in 2014 was 41% below the 2005 level.³
- Between 2005 and 2014, case rates decreased 45% for property offense cases, 40% for public order offenses, 39% for person offenses, and 28% for drug law violations.

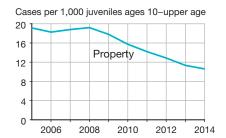

The delinquency case rate declined from 52.1 per 1,000 juveniles in 2005 to 39.0 in 2014

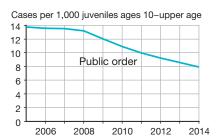

Between 2005 and 2014, case rates decreased the most for property offenses (from 19.1 to 10.6 per 1,000 juveniles)

³ The percent change in the number of cases disposed may not be equal to the percent change in case rates because of the changing size of the juvenile population.

Age at Referral

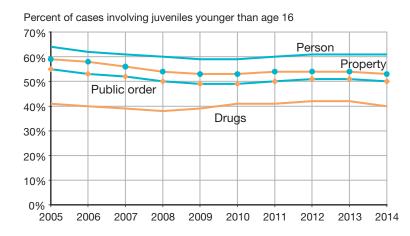

Of the 974,900 delinquency cases processed in 2014, 53% involved youth younger than 16, 28% involved females, and 43% involved white youth

Percentage of total juvenile court cases, 2014

			,	_
	Number	Younger

Other public order offenses	19,700	47	25	45

Note: Detail may not add to totals because of rounding.

In 2014, juveniles younger than 16 accounted for more than half of all delinquency cases, including 61% of person offense cases

- The proportion of cases involving juveniles age 15 or younger varied by offense category. Between 2005 and 2014, younger juveniles accounted for a smaller proportion of drug and public order cases than of person and property offense cases.
- In 2014, juveniles younger than 16 accounted for three-quarters (77%) of juvenile arson cases.

Offense profile of delinquency cases by age group:

Most serious offense	Age 15 or younger	Age 16 or older
2014		
Person	31%	22%
Property	35	34
Drugs	10	17
Public order	24	27
Total	100%	100%
2005		
Person	29%	22%
Property	38	35
Drugs	8	15
Public order	25	28
Total	100%	100%

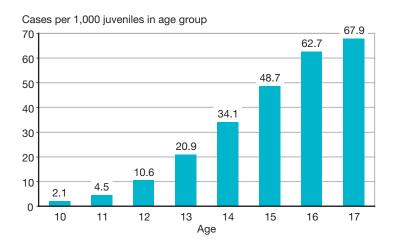

Note: Detail may not total 100% because of rounding.

- Compared with the delinquency caseload involving older juveniles, the caseload of youth age 15 or younger in 2014 included larger proportions of person and property offense cases and smaller proportions of drug and public order offense cases.
- Compared with 2005, the caseload in 2014 for both younger and older juveniles involved slightly greater proportions of person and drug offense cases, and slightly smaller proportions of property and public order offense cases.

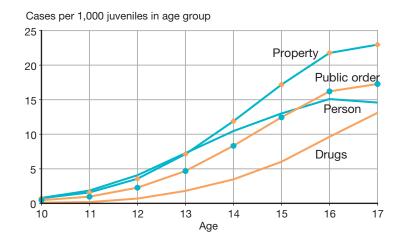

Age at Referral

- Although, in general, more 17-yearolds than 16-year-olds are arrested, the number of juvenile court cases involving 17-year-olds (194,500) was lower than the number involving 16-year-olds (238,100) in 2014. The explanation lies primarily in the fact that in 10 states 17-year-olds are excluded from the original jurisdiction of the juvenile court. In these states, all 17-year-olds are legally adults and are referred to criminal court rather than to juvenile court. Thus, far fewer 17-year-olds than 16-year-olds are subject to original juvenile court jurisdiction.
- In 2014, the delinquency case rate for 17-year-olds (67.9) was twice the rate for 14-year-olds (34.1) and more than 3 times the rate for 13-year-olds (20.9).
- The largest increase in case rates between age 13 and age 17 was for drug offenses. The case rate for drug offenses for 17-year-old juveniles (13.1) was more than 7 times the rate for 13-year-olds (1.8).
- For public order offenses in 2014, the case rate for 17-year-olds (17.3) was nearly 4 times the rate for 13-year-olds (4.7) and the property offense case rate for 17-year-olds (23.0) was more than 3 times the rate for 13-year-olds (7.1).
- For cases involving person offenses, the case rate for 17-year-olds (14.6) was double the rate for 13-year-olds (7.3).

In 2014, delinquency case rates increased with the referral age of the juvenile

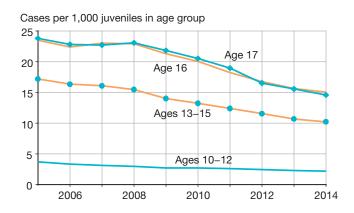

Case rates increased continuously with age for property, drug, and public order offense cases, while person offense case rates leveled off after age 16

Age at Referral

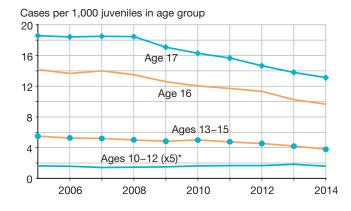

Trends in case rates were similar across age groups between 2005 and 2014 for each general offense category

Person offense case rates

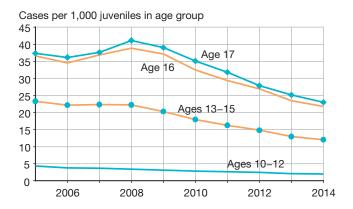

- Between 2005 and 2014, person offense case rates were at their highest in 2005 for all age groups.
- Since 2005, person offense case rates for all age groups declined through 2014: down 40% each for youth ages 10–12 and ages 13–15, 36% for 16-yearolds, and 39% for 17-year-olds.

Drug offense case rates

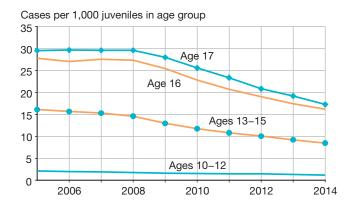

Drug offense case rates were at their lowest level in 2014 for all youth age 13 and older. Compared to 2005, rates in 2014 were 31% lower for youth ages 13–15, 32% lower for 16-year-olds, and 30% lower for 17-year-olds. In contrast, drug offense case rates for youth ages 10–12 increased 14% between 2005 and 2013, before declining 14% in 2014. The overall decrease in case rates between 2005 and 2014 for youth ages 10–12 was 2%.

Property offense case rates

- Property offense case rates were at their highest in 2005 for youth ages 10–12 and 13–15, and peaked in 2008 for youth ages 16 and 17, before declining through 2014.
- Property offense case rates were lower in 2014 than in 2005 for all age groups. In 2014, the case rate for juveniles ages 10–12 was 55% less than the 2005 rate, the rate for juveniles ages 13–15 was 48% less, the rate for 16-year-olds was 40% less, and the rate for 17-year-olds was 38% less.

Public order offense case rates

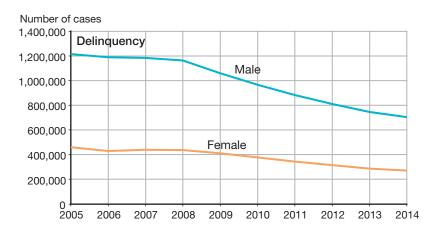

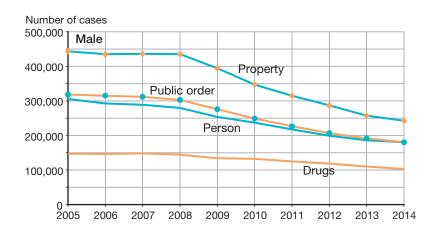

■ Public order case rates for all age groups were at their lowest levels in 2014 since at least 2005. Case rates declined at a similar pace for all age groups: 43% for youth ages 10–12, 47% for youth ages 13–15, and 42% each for youth ages 16 and 17.

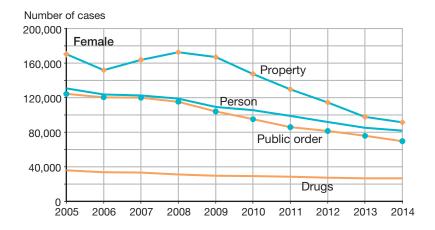

^{*} Because of the relatively low volume of cases involving youth ages 10–12 for drug offenses, their case rates are inflated by a factor of 5 to display the trend over time.

- Males were involved in 72% (705,100) of the delinquency cases handled by juvenile courts in 2014.
- The average annual decrease in the male and female delinquency caseloads was very similar for all offense types between 2005 and 2014. The average decease was slightly larger for males than females for cases involving person (6% vs. 5%) and drug (4% vs. 3%) offense cases, and equal for property and public order offense cases (6% each).
- Between 2005 and 2014, the number of property offense cases involving males was at its highest level in 2005, and the female caseload peaked in 2008. Between their respective peaks and 2014, the male caseload declined 45% while the female caseload fell 47%.
- Drug offense cases involving males were level between 2005 and 2007, before decreasing 31% through 2014. Drug offense cases involving females decreased steadily between 2005 and 2014, and in 2014 the number of cases was 26% below the level in 2005.
- The public order offense caseload decreased at a similar pace for both males and females between 2005 and 2014 (43% and 44%, respectively).

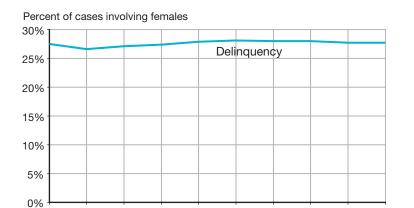

The overall decline in the male and female delinquency caseloads between 2005 and 2014 was the same (42% each)

Females accounted for 28% of the delinquency caseload in 2014 — the same as in 2005

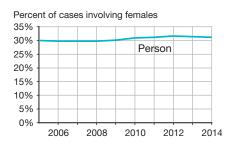

2009

2010

2011

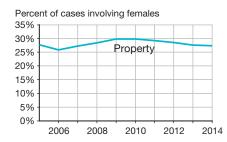

2008

2007

2006

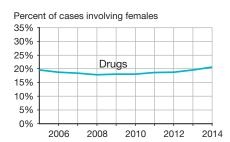

2005

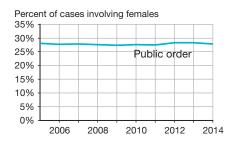

2012

2013

2014

Between 2005 and 2014, the female proportion of the person offense caseload has remained steady, from 30% to 31%.

Offense profile of delinquency cases for males and females:

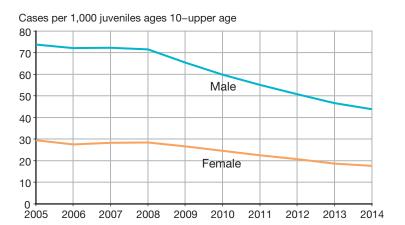

Most serious		
offense	Male	Female
2014		
Person	26%	30%
Property	34	34
Drugs	15	10
Public order	26	26
Total	100%	100%
2005		
Person	25%	28%
Property	37	37
Drugs	12	8
Public order	26	27
Total	100%	100%

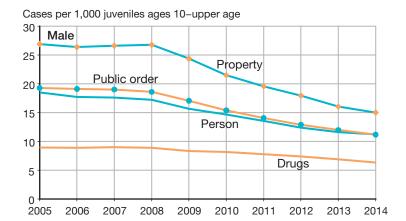

Note: Detail may not total 100% because of rounding.

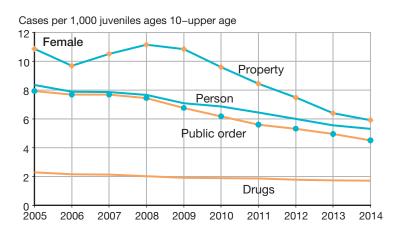

- For both males and females, the property offense proportions of the delinquency caseloads were less in 2014 than in 2005.
- In 2014, the male caseload contained a greater proportion of drug offenses than the female caseload and a smaller proportion of person offenses.
- The male caseload contained the same proportions of property and public order offenses as the female caseload in 2014.

- The decrease in the delinquency case rate was the same for males and females between 2005 and 2014 (41% each). Most of the decline occurred between 2008 and 2014 (down 39% for males and 38% for females).
- In 2014, the delinquency case rate for males was 2.5 times the rate for females, 43.8 compared with 17.5.
- In 2014, case rates for all offense types were at their lowest level since 2005 for both males and females.
- Between 2005 and 2014, male case rates decreased 29% for drug offenses, 39% for person offenses, 42% for public order offenses, and 44% for property offenses. The patterns in case rate decreases were similar for females, down 25% for drug offenses, 36% for person offenses, 43% for public order offenses, and 45% for property offenses.
- Despite a decrease in the disparity between male and female delinquency case rates between 2005 and 2014, the male case rate for drug offense cases was 3.7 times that of the female case rate. Male rates were between 2.1 and 2.5 times female rates for all other offense types in 2014.

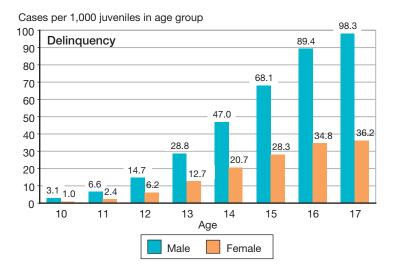

Despite decreases in case rates for both males and females, the male case rate remained at least twice the rate of females for all years between 2005 and 2014

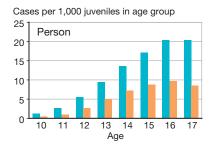

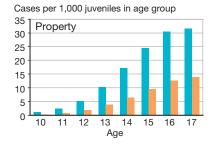

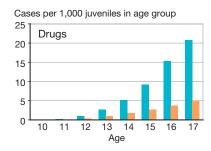

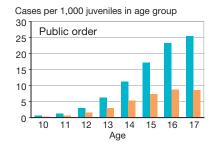

In 2014, the delinquency case rate for males and females increased steadily through age 17

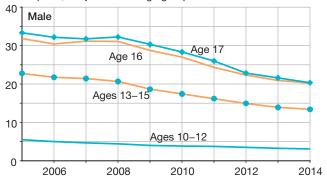

- In 2014, the difference between agespecific male and female delinquency case rates was greatest for the younger juveniles. The male delinquency rate for 10-year-olds was 3.1 times the female rate; for 11-yearolds, the male case rate was 2.8 times the female rate.
- In all four delinquency offense categories in 2014, case rates increased continuously through age 17 for males. For females, case rates for property and drug offenses increased through age 17, while case rates for person and public order offenses peaked at age 16.
- In 2014, the drug offense case rate for 17-year-old males was nearly 20 times the rate for 12-year-old males; among females, the drug offense case rate for 17-year-olds was 14 times the rate for 12-year-olds.

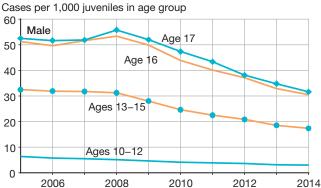

Across all age groups and offense categories, case rates for males exceed rates for females; however, rates for both males and females have declined substantially in the past 10 years

Person offense case rates

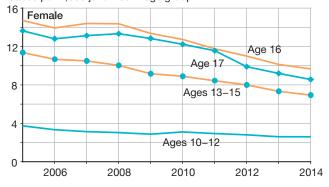

Cases per 1,000 juveniles in age group

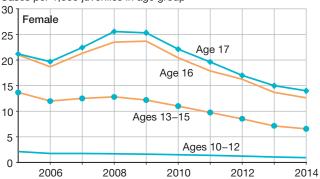

Property offense case rates

Cases per 1,000 juveniles in age group

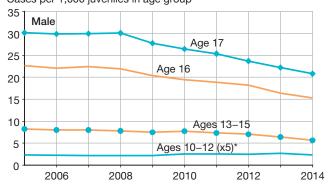

Cases per 1,000 juveniles in age group

- In the last 10 years (2005 through 2014), male person offense case rates decreased for all age groups: 43% for youth ages 10-12, 41% for youth ages 13-15, 36% for 16-year-olds, and 39% for 17-year-olds.
- During the same period, female person offense case rates followed a similar pattern as males, decreasing 30% for youth ages 10-12, 39% for youth ages 13-15, 34% for 16-year-olds, and 37% for 17-year-olds.
- Male property offense case rates decreased to their lowest levels for all age groups in 2014.
- Between 2005 and 2014, male property case rates decreased 54% for youth ages 10-12, 47% for ages 13-15, 41% for age 16, and 40% for age 17.
- Similar to the male rates, age-specific property offense rates for females were at their lowest level for all age groups in 2014.

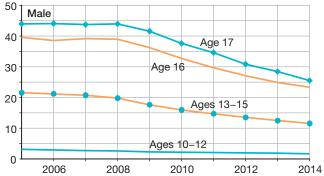

Drug offense case rates

Cases per 1,000 juveniles in age group

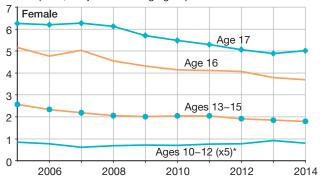

Public order offense case rates

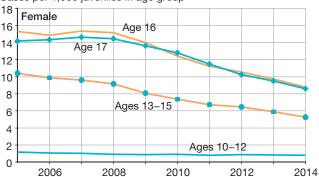

Cases per 1,000 juveniles in age group

Cases per 1,000 juveniles in age group

Cases per 1,000 juveniles in age group

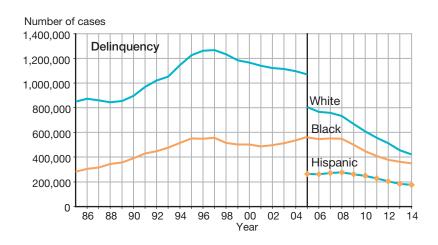

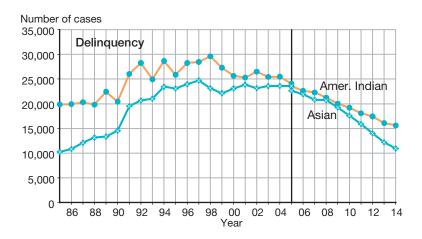

- The male drug offense case rate remained relatively stable between 2005 and 2014 for youth ages 10–12, while case rates decreased 31% each for youth ages 13–15 and age 17, and 32% for youth age 16. Most of the decreases occurred between 2008 and 2014 (down 28% for youth ages 13–15, 30% for youth age 16, and 31% for youth age 17).
- Female drug offense case rates for youth ages 10–12 increased 9% from 2005 to 2013, before decreasing 13% in 2014. Despite a 3% increase between 2013 and 2014 for 17-year-old females, the drug offense case rate decreased 20% between 2005 and 2014. Over the time period, case rates decreased 30% for females ages 13–15 and 29% for those age 16.
- Across gender and age groups, public order offense case rates in 2014 were at their lowest level since 2005.
- Between 2005 and 2014, public order case rates decreased at a similar pace for both males and females across all age groups. Male case rates decreased 47% for youth ages 10–12, 46% for youth ages 13–15, 41% for youth age 16, and 42% for youth age 17. Similarly, female case rates decreased 33% for youth ages 10–12, 49% for youth ages 13–15, 43% for youth age 16, and 39% for youth age 17.

^{*} Because of the relatively low volume of cases involving male and female youth ages 10–12 for drug offenses, their case rates are inflated by a factor of 5 to display the trends over time.

- With the release of the 2014 data, detailed race estimates developed by the National Juvenile Court Data Archive (Archive) project were expanded to include estimates for cases involving Hispanic youth for data years 2005-2014. As a result of this change, race data for the 1985-2004 data period are not comparable with the current reporting period. In previous years, the Archive project developed race estimates for four race groups (white, black, American Indian⁴, and Asian⁵) without consideration of ethnicity; that is, during this data period, persons of Hispanic ethnicity can be of any race and are included within each of the four racial groups. Beginning with the 2005 data vear, persons of Hispanic ethnicity are treated as a distinct race group and are excluded from the other four race groups.6
- Since a large proportion of Hispanic youth are white, the estimated number of cases involving white youth is substantially less with the new reporting method. For example, for 2005, the estimated number of delinquency cases involving white youth when using the previous method of including Hispanic youth is 1,071,100, compared with 806,200 cases when using the current method.

⁴ The racial classification American Indian (usually abbreviated as Amer. Indian) includes American Indian and Alaskan Native. The method of estimating race was revised beginning with the 2005 data year to detail estimates for cases involving Hispanic youth

⁵ The racial classification Asian includes Asian, Native Hawaiian, and Other Pacific Islander.

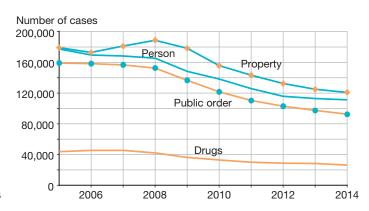

⁶ An important exception must be noted. Data provided to the Archive did not always allow for identification of Hispanic ethnicity for cases involving American Indian youth. Specifically, data from many jurisdictions did not include any means to determine the ethnicity of American Indian youth. Rather than assume ethnicity for these youth, they are classified solely on their racial classification; as such, the American Indian group includes an unknown proportion of Hispanic youth.

Between 2005 and 2014, the number of cases decreased for all racial groups and offenses

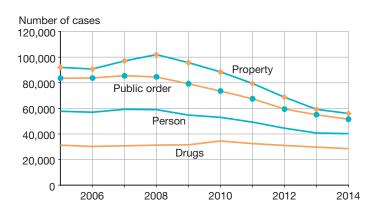

White

- Property offenses accounted for the largest proportion of Hispanic cases in 2014; cases involving person offenses constituted a smaller proportion of the caseload (32% and 23%, respectively).
- The proportion of cases involving Hispanic females was greatest for larceny-theft cases (38%), followed by disorderly conduct (36%) and simple assault cases (35%).
- Youth age 15 or younger accounted for nearly 4 in 5 arson cases involving Hispanic youth.
- In 2014, the offense profile was similar to that of 2005 for all racial groups. However, the proportion of delinquency cases that involved property offenses decreased for all racial groups except black youth.
- The offense profile was similar for white and black youth; property offenses accounted for the largest proportion of caseloads, followed by person, public order, and drug offense cases.
- The offense profile for Hispanic and Asian youth followed a similar pattern; property offense cases accounted for the largest proportion of caseloads, followed by public order, person, and drug offense cases.
- In 2014, the offense profile for American Indian youth contained equal proportions for person and public order offense cases.

Females accounted for one-quarter of the Hispanic delinquency caseload; youth younger than 16 accounted for half of the caseload

	2014 Hispanic caseload

In 2014, 43% of all delinquency cases involved white youth: 40% of person offense cases, 44% of property offense cases, 55% of drug offense cases, and 40% of public order offense cases

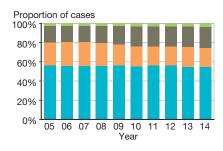

Person offense cases

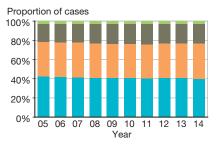

Property offense cases

Drug offense cases

Public order offense cases

^{*} Because American Indian and Asian proportions are too small to display individually, they are combined in the category "Other races" in the above graphs.

In 2014, white youth made up 56% of the U.S. population under juvenile court jurisdiction, black youth 15%, Hispanic youth 23%, American Indian youth 1%, and Asian youth 5%.

Racial profile of delinquency cases:

Race	2005	2014
White	48%	43%
Black	33	36
Hispanic	16	18
American Indian	1	2
Asian	1	1
Total	100%	100%

Note: Detail may not total 100% because of rounding.

- Although white youth represented the largest share of the delinquency caseload, their relative contribution declined between 2005 and 2014, from 48% to 43%.
- The proportion of delinquency cases involving black youth and Hispanic youth increased between 2005 and 2014.
- For each year from 2005 through 2014, American Indian youth made up less than 3% of the delinquency caseload; Asian youth made up 1%.

Racial profile of delinquency cases by offense:

Between 2005 and 2014, delinquency case rates declined for youth of all racial groups: 42% for whites, 32% for blacks, 45% for Hispanics, 39% for American Indians, and 61% for Asians

- In 2014, the total delinquency case rate for white youth and Hispanic youth was similar (24.1 and 25.1, respectively). The case rate for black juveniles (75.1) was about triple the rates for white youth, Hispanic youth, and American Indian youth (27.0), and more than 11 times the case rate for Asian youth (6.3).
- In 2014, the person offense case rate for black juveniles (23.8) was about 4 times the rate for Hispanic youth (5.7), white youth (6.0), and American Indian youth (6.3), and nearly 18 times that of Asian youth (1.3).
- Case rates in 2014 were lower than in 2005 for each racial group for all four offense categories.

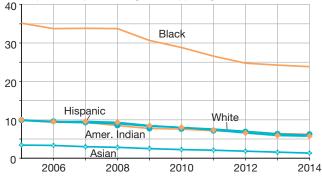

Delinquency

Cases per 1,000 juveniles ages 10-upper age

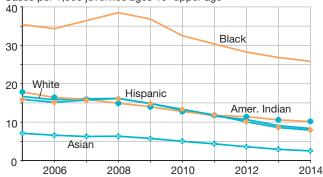

Person

Cases per 1,000 juveniles ages 10-upper age

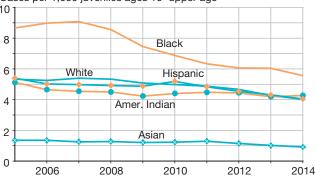

Property

Cases per 1,000 juveniles ages 10-upper age

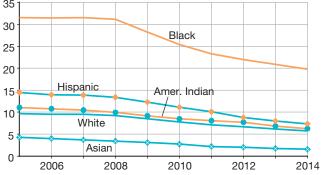

Drugs

Cases per 1,000 juveniles ages 10-upper age

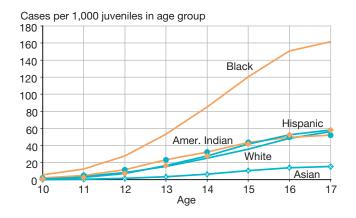

Public order

Cases per 1,000 juveniles ages 10-upper age

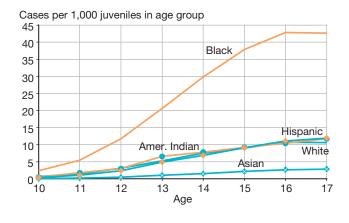

Case rates for juveniles generally increased with age for person, drug, and public order offenses, regardless of race

Delinquency

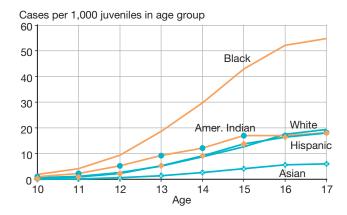

- In 2014, the delinquency case rate for 13-year-olds was more than 8 times the rate for 10-year-olds for each racial group.
- In 2014, case rates for person, property, and public order offenses were higher for black juveniles than those for youth of all other race categories for each age group.
- Age-specific person offense rates for black juveniles in 2014 averaged more than 3 times the rates for white youth, Hispanic youth, and American Indian youth.
- The person offense case rate for 16-year-olds was twice the rate for 13-year-olds for all racial groups except American Indian.
- In 2014, age-specific case rates for drug offenses were higher for black youth ages 15 through 17 than for youth of the same age in all other racial categories.

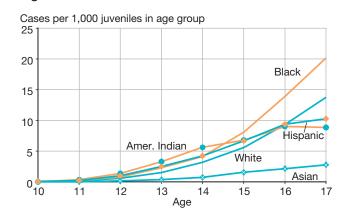

Person

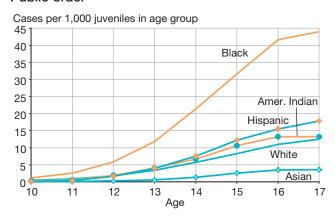

Property

Drugs

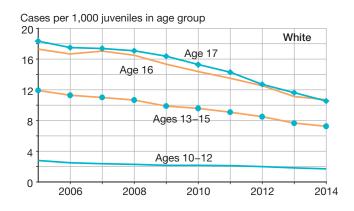

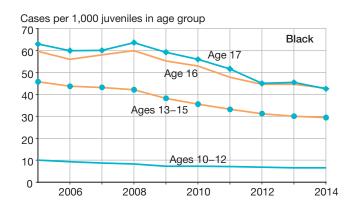

Public order

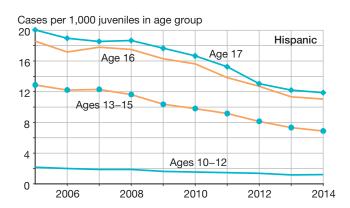

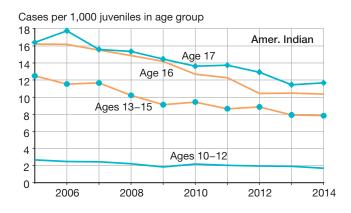

Case rates for person offenses in 2014 were lower than those in 2005 for all age groups for all races

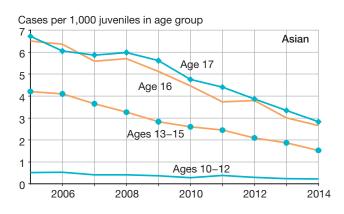

Person offense case rates

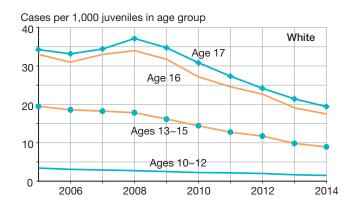

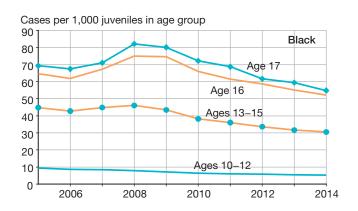

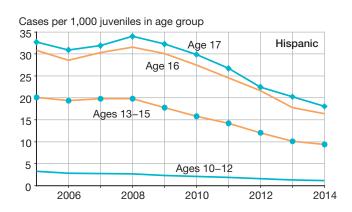

- Since 2005, person offense case rates were at their lowest level in 2014 for all age groups within each racial category, with the exception of American Indian youth age 17 and Hispanic youth ages 10–12, which had their lowest level in 2013.
- Decreases in person offense case rates were similar for all age groups within each racial category.
- Between 2005 and 2014, person offense case rates for American Indian youth decreased less for youth age 17 (29%) than for youth ages 10–12 (36%), ages 13–15 (37%), and age 16 (36%).

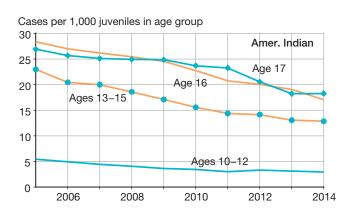

Property offense case rates were at their lowest level in 2014 for all age groups within each racial category, with the exception of American Indian youth age 17, which had its lowest level in 2013

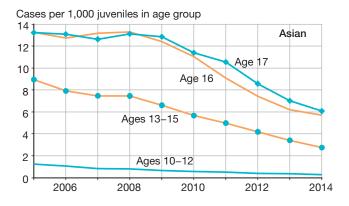

Property offense case rates

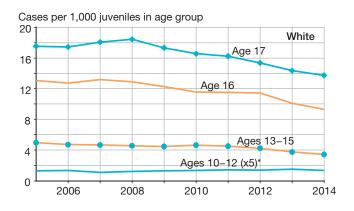

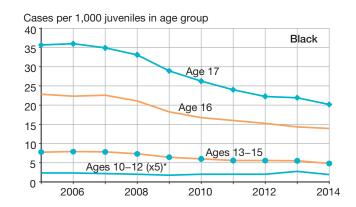

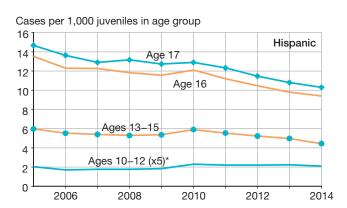

- Among all racial groups, property offense case rates decreased more for youth ages 10–12 and 13–15, than youth age 16 and age 17.
- Property offense case rates decreased the least for black youth age 16 and age 17 (19% and 21%, respectively) and decreased the most for Asian youth ages 10–12 and ages 13–15 (77% and 69%, respectively) between 2005 and 2014.

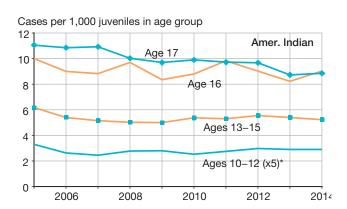

With few exceptions, drug offense case rates for all age groups within each racial category declined in the 10-year period 2005–2014

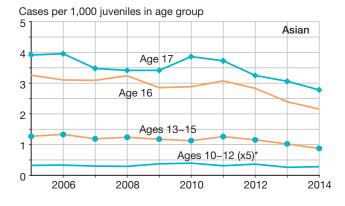

Drug offense case rates

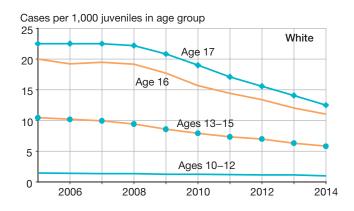

- Changes in age specific case rates for drug offenses varied by racial group between 2005 and 2014. Case rates decreased for all age groups for black youth, American Indian youth, and Asian youth.
- Drug offense case rates increased slightly for youth ages 10–12 for white youth and Hispanic youth, and decreased for all other age groups for both races.
- Between 2005 and 2014, age-specific case rates for all racial groups decreased by at least 20% for youth age 17, while decreases in other age groups varied.

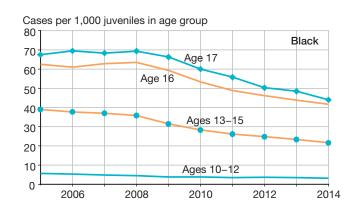

^{*} Because of the relatively low volume of cases involving youth of all races ages 10–12 for drug offenses, their case rates are inflated by a factor of 5 to display the trends over time.

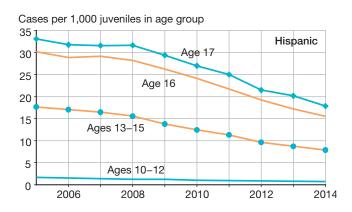

Race

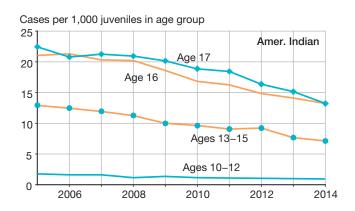

In 2014, public order case rates were at the lowest level since 2005 for all age groups in all racial categories except Asian youth ages 10–12, which had its lowest rate in 2013

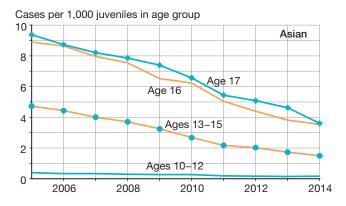

Public order offense case rates

- Between 2005 and 2014, age-specific public order case rates decreased least for black youth age 16 and 17 (33% and 35%, respectively) and most for Asian youth ages 13–15 (69%).
- Case rates for Asian youth ages 10–12 decreased 65% between 2005 and 2013, before increasing 16% in 2014.
- With the exception of white youth, public order case rates decreased more for youth ages 10–12 and ages 13–15 than for youth age 16 and age 17 between 2005 and 2014.

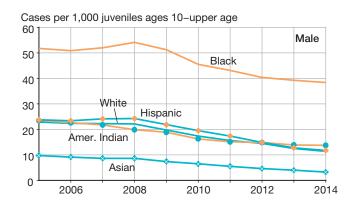

Race

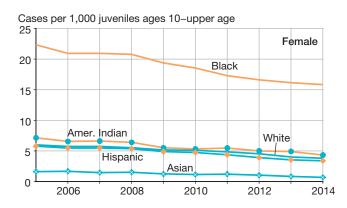

For both males and females, case rates for black youth were higher than rates for all other racial groups for all offense categories except drug offenses involving females

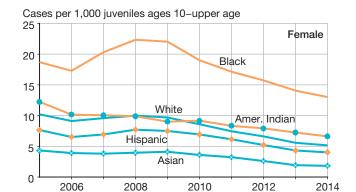

Person offense case rates

Cases per 1,000 juveniles ages 10-upper age Male Black 40 30 20 Hispanic White 10 Amer. Indian Asian 0 2006 2008 2010 2012 2014

Property offense case rates

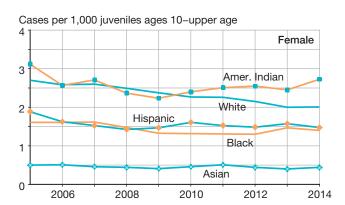

- For all years between 2005 and 2014, person offense case rates for black males were 3 to 4 times higher than the corresponding rates for white, Hispanic, and American Indian males, and 9 to 16 times higher than those for Asian males.
- In 2014, the person offense case rate for black females (15.8) was 23 times the rate for Asian females (0.7) and 4 to 5 times the rate for Hispanic females (3.4), white females (3.8), and American Indian females (4.3).
- Among males and females, property offense case rates were lower in 2014 than in 2005 for all racial groups.

Race

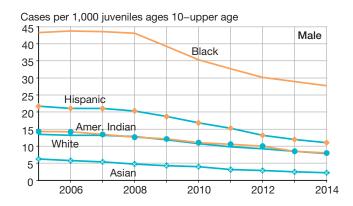

Drug offense case rates

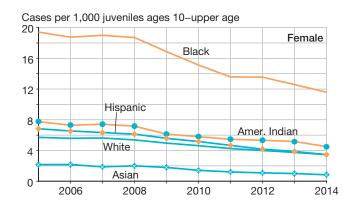

Cases per 1,000 juveniles ages 10-upper age Male 16 Black 14 12 10 White Hispanic 8 6 Amer. Indian 4 2 Asian 0 2006 2008 2010 2012 2014

- For all years between 2005 and 2014, drug offense case rates were higher for black males than for males of all other races. In 2014, the rate for black males (9.6) was about 7 times the rate for Asian males, and at least 1.5 times the rate for white males, Hispanic males, and American Indian males.
- In 2014, the drug offense case rate for American Indian females was higher than the corresponding rate for all other race groups: nearly 1.5 times the rate for white youth, nearly double the rates for Hispanic youth and black youth, and more than 6 times the rate for Asian youth.

Public order offense case rates

- Between 2005 and 2014, cases involving Asian youth showed the largest relative decrease in public order offense case rates for males and females. During this period, the public order case rate for Asian males decreased 64% while the rate for Asian females decreased 61%.
- In 2014, the public order offense case rate for black males was more than twice the rate for Hispanic males, more than 3 times the rate for both white males and American Indian males, and more than 12 times the rate for Asian males.

Chapter 3

National Estimates of Delinquency Case Processing

This chapter quantifies the flow of delinquency cases referred to juvenile court through the stages of the juvenile court system as follows.

Referral: An agency or individual files a complaint with court intake that initiates court processing. Cases can be referred to court intake by a number of sources, including law enforcement agencies, social service agencies, schools, parents, probation officers, and victims.

Detention: Juvenile courts sometimes hold youth in secure detention facilities during court processing to protect the community, to ensure a juvenile's appearance at subsequent court hearings, to secure the juvenile's own safety, or for the purpose of evaluating the juvenile. This report describes the use of detention between court referral and case disposition only, although juveniles can be detained by police prior to referral and also by the courts after disposition while awaiting placement elsewhere.

Intake: Formal processing of a case involves the filing of a petition that requests an adjudicatory or waiver hearing. Informally processed cases, on the other hand, are handled without a petition and without an adjudicatory or waiver hearing.

Waiver: One of the first decisions made at intake is whether a case should be processed in the criminal (adult) justice system rather than in the juvenile court. Most states have more than one mechanism for transferring cases to criminal court: prosecutors may have the authority to file certain juvenile cases directly in criminal court; state statute may order that cases meeting certain age and offense criteria be excluded from juvenile court jurisdiction and filed directly in criminal court; and a juvenile court judge may waive juvenile court jurisdiction in certain juvenile cases, thus authorizing a transfer to criminal court. This report describes those cases that were transferred to criminal court by judicial waiver only.

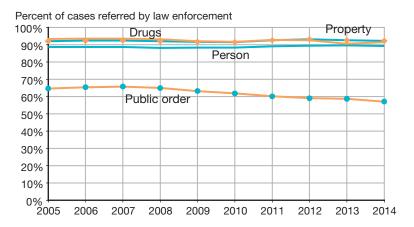

Adjudication: At an adjudicatory hearing, a youth may be adjudicated (judged) delinquent if the juvenile court determines that the youth did commit the offense(s) charged in the petition. If the youth is adjudicated, the case proceeds to a disposition hearing. Alternatively, a case can be dismissed or continued in contemplation of dismissal. In these cases where the youth is not adjudicated delinquent, the court can recommend that the youth take some actions prior to the final adjudication decision, such as paying restitution or voluntarily attending drug counseling.

Disposition: Disposition options include commitment to an institution or other residential facility, probation supervision, or a variety of other sanctions, such as community service, restitution or fines, or referral to an outside agency or treatment program. This report characterizes

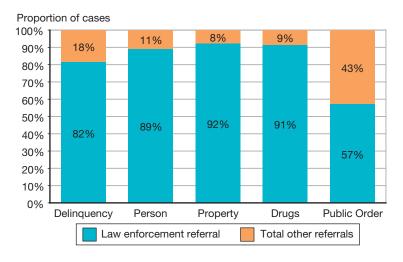

case disposition by the most severe or restrictive sanction. For example, although most youth in out-of-home placements are also technically on probation, in this report cases resulting in placement are not included in the probation group. This chapter describes case processing by offense and by demographics (age, gender, and race) of the juveniles involved, focusing on cases disposed in 2014 and examining trends from 2005 through 2014.

Referral

Law enforcement agencies are the primary source of delinquency referrals to juvenile court

Property offense cases were most likely to be referred by law enforcement, compared with other offense types

Source of referral profile, 2014:

Referral source	Delinquency	Person	Property	Drugs	Public order
Law enforcement	82%	89%	92%	91%	57%
School	2%	2%	1%	4%	4%
Relative	1%	2%	1%	1%	1%
Other	15%	7%	6%	4%	38%
Total	100%	100%	100%	100%	100%

Note: Detail may not add to totals because of rounding.

- Between 2005 and 2014, law enforcement agencies were the primary source of delinquency referrals for each year.
- In 2014, 82% of all delinquency cases were referred by law enforcement; however, there were variations across offense categories.
- Law enforcement agencies referred 92% of property offense cases, 91% of drug law violation cases, 89% of person offense cases, and 57% of public order offense cases in 2014.
- For each year between 2005 and 2014, public order offense cases had the smallest proportion of cases referred to court by law enforcement. This may be attributed in part to the fact that this offense category contains probation violations and contempt-of-court cases, which are most often referred by court personnel.
- Law enforcement referred a slightly smaller proportion of all delinquency cases in 2014 (82%) than in 2005 (84%).

Detention

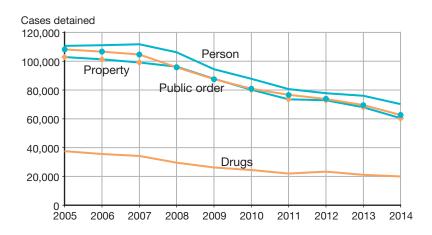

- The number of delinquency cases involving detention decreased 41% between 2005 and 2014 to its lowest level in the analysis period. The largest relative decline since 2005 was for drug offense cases involving detention, down 47%, compared with 42% for public order offenses, 41% for property offenses, and 37% for person offenses.
- Despite the decrease in the volume of delinquency cases involving detention, the proportion of cases detained was slightly larger in 2014 (22%) than in 2005 (21%).
- Between 2005 and 2014, the use of detention decreased for drug law violation cases (from 20% to 15%), increased for person offense cases (from 25% to 27%), and changed little for property offense cases (from 17% to 18%) and public order offense cases (from 24% to 25%).

Offense profile of detained delinquency cases:

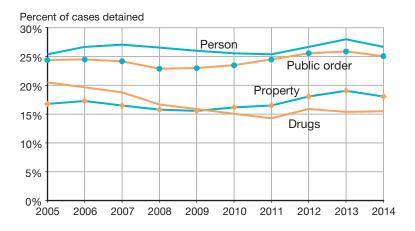

Most serious		
offense	2005	2014
Person	31%	33%
Property	29	28
Drugs	10	9
Public order	30	29
Total	100%	100%
Number of cases	359,000	212,900

Note: Detail may not total 100% because of rounding.

 Compared with 2005, the offense characteristics of the 2014 detention caseload were similar. The number of cases involving detention decreased between 2005 and 2014 for all offense categories

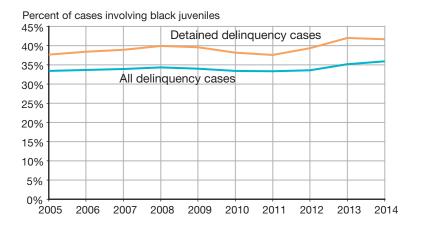

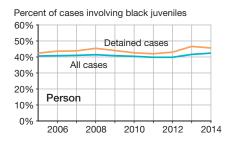

The proportions of cases involving detention remained relatively stable between 2005 and 2014 for person, property, and public order offense cases and decreased for drug offense cases

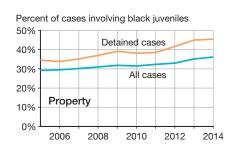

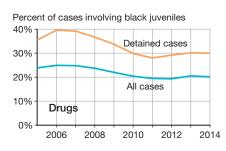

Detention

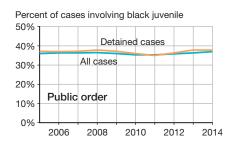

While black youth represented 36% of the overall delinquency caseload in 2014, they made up 42% of the detention caseload

- Between 2005 and 2014, the proportion of all delinquency cases that involved black youth averaged 34%, while that average was 39% of all detained cases.
- Overrepresentation of black youth was greatest for drug offense cases. On average, between 2005 and 2014, black youth accounted for 22% of all cases involving drug offense violations but represented 33% of such cases detained.
- Between 2005 and 2006, the proportion of detained drug offense cases involving black youth increased (from 36% to 40%). Since that time, the proportion of detained drug offense cases involving black youth fell, resulting in a level in 2014 that was 6 percentage points below 2005.
- Black youth accounted for 20% of all drug offense cases processed in 2014 but were involved in 30% of the drug offenses that involved detention.
- Black youth accounted for 42% of the person offense cases processed in 2014 and 45% of those detained.
- In 2014, the proportion of property offense cases involving black youth was 36%, while the proportion of detained property offense cases involving black youth was 45%.
- Black juveniles made up 37% of public order offense cases processed in 2014 and 38% of those detained.

Detention

Age

- In each year from 2005 through 2014, delinquency cases involving youth age 16 or older were more likely to be detained than were cases involving youth age 15 or younger.
- For all years between 2005 and 2014, person offense cases for youth age 15 or younger were more likely to involve detention than were other offenses.

Gender

In 2014, male juveniles charged with delinquency offenses were more likely than females to be held in secure facilities while awaiting court disposition. Overall in 2014, 24% of male delinquency cases involved detention, compared with 17% of female cases.

Offense profile of detained delinquency cases by gender, 2014:

Most serious offense	Male	Female
Person	31%	39%
Property	30	24
Drugs	10	7
Public order	29	30
Total	100%	100%

Race

- Cases involving black youth and Hispanic youth were more likely to be detained than cases involving white youth in each year between 2005 and 2014 across offense categories.
- In 2014, person offense cases involving Asian youth were more likely to involve detention (34%) than those involving all other races.

Detention was more likely for cases involving older youth than younger youth, and for cases involving males than females

	Percentage of cases detained			
Most serious	Age 15	Age 16		
offense	and younger	and older	Male	Female
2014				
Delinquency	20%	24%	24%	17%

Person	23	26	30	28	29
Property	15	20	18	19	17
Drugs	16	30	23	22	18
Public order	22	25	27	33	26

Intake Decision

Each year between 2005 and 2014, delinquency cases were more likely to be handled formally, with the filing of a petition for adjudication, than informally

Regardless of offense type, the number of petitioned cases decreased between 2005 and 2014

- Between 2005 and 2014, the likelihood that a delinquency case would be handled informally (without filing a petition for adjudication) decreased at a similar rate as formally handled cases. As the overall delinquency caseload decreased 42% between 2005 and 2014, the number of nonpetitioned cases decreased 43% to its lowest level in 2014, and the number of petitioned cases decreased 41%.
- The largest relative decrease in the number of petitioned cases between 2005 and 2014 was seen in property offense cases (44%), followed by public order offense cases (41%), drug offense cases (39%), and person offense cases (38%).

Offense profile of delinquency cases, 2014:

Most serious offense	Nonpetitioned	Petitioned
Person	26%	28%
Property	36	33
Drugs	15	12
Public order	23	27
Total	100%	100%
Number of cases	432,500	542,500

Note: Detail may not total 100% because of rounding.

 In 2014, the offense profiles of nonpetitioned and petitioned delinquency cases were similar.

Intake Decision

- The overall likelihood of formal handling was greater for more serious offenses within the same general offense category. In 2014, for example, 74% of aggravated assault cases were handled formally, compared with 52% of simple assault cases. Similarly, 75% of burglary cases and motor vehicle theft cases were handled formally by juvenile courts, compared with 45% of larceny-theft and of trespassing cases.
- Youth younger than 16 accounted for 50% of the delinquency cases handled formally by juvenile courts in 2014; females accounted for 24% and white youth accounted for 40% of petitioned cases.
- Between 2005 and 2014, the likelihood of formal processing increased: from 57% to 60% for public order cases, from 52% to 54% for property offense cases, and from 56% to 58% for person offense cases.
- In 2014, 49% of drug offense cases were petitioned—a lower percentage than in 2005, when 57% were petitioned.
- Between 2005 and 2010, property offense cases were less likely than cases in each of the other general offense categories to be handled with a petition for adjudication; in 2014, drug offense cases were the least likely.

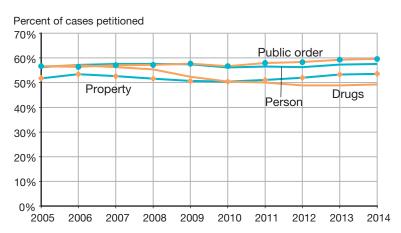

In 2014, juvenile courts petitioned 56% of all delinquency cases

		Percentage		centage of	
		of total	petitio	ned cases,	2014
	Petitioned	delinquency	Younger

Property	49	57	51	52	51
Drugs	51	70	56	51	59
Public order	57	58	54	67	62

Age

- In each year between 2005 and 2014, delinquency cases involving juveniles age 16 or older were more likely to be petitioned than were cases involving younger juveniles.
- In 2014, 53% of delinquency cases involving youth age 15 or younger were petitioned, compared with 59% of cases involving older youth.

Gender

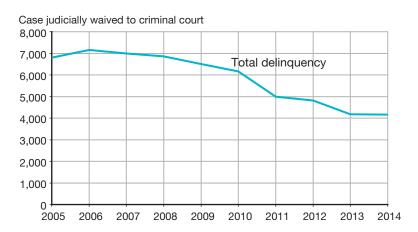

- Between 2005 and 2014, the likelihood of formal case processing for delinquency cases increased slightly for both males (from 58% to 59%) and females (from 47% to 48%).
- For both males and females, the likelihood of formal case processing decreased for drug offense cases (down 7 and 6 percentage points, respectively). The use of formal case processing increased slightly for all other offense types for both males and females, with the largest increase occurring for males involved in public order offense cases (up 4 percentage points).

Race

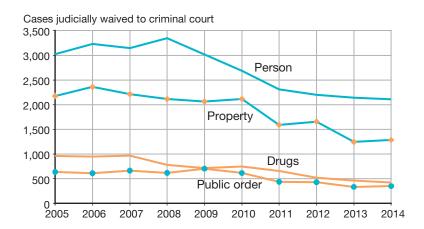

- The proportion of delinquency cases petitioned decreased slightly between 2005 and 2014 for Hispanic and Asian youth (down 1 and 2 percentage points, respectively), remained the same for white and American Indian youth, and increased slightly for black youth (up 3 percentage points).
- For each year between 2005 and 2014, drug offense cases involving black juveniles were more likely to be petitioned than were such cases involving any other racial group.

- Between 2005 and 2014, the number of delinquency cases waived to criminal court was at its highest in 2006 (7,200). By 2014, the number of cases waived had decreased by 42%, to its lowest level during that time period.
- The number of judicially waived person offense cases increased 11% between 2005 and 2008 and then fell 37% through 2014.
- The number of drug offense cases judicially waived remained stable between 2005 and 2007 before falling 56% by 2014.
- For public order offenses, the number of waived cases decreased 45% between 2005 and 2014.
- Between 2005 and 2014, the largest number of judicially waived cases involved person offense cases.
- Historically, the number of cases judicially waived declined after 1994 and may be attributable in part to the large increase in the number of states that passed legislation excluding certain serious offenses from juvenile court jurisdiction and legislation permitting the prosecutor to file certain cases directly in criminal court.

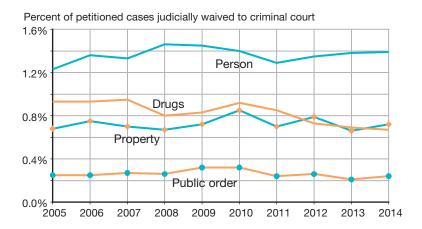

The number of cases judicially waived to criminal court decreased 39% between 2005 and 2014

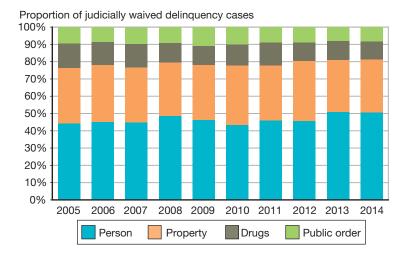

Since 2005, the number of cases judicially waived to criminal court decreased the most for drug offenses (56%), followed by public order (45%), property (41%), and person offenses (30%)

For all years from 2005 to 2014, cases involving person offense cases were most likely to be judicially waived

Between 2005 and 2014, the offense profile of the judicially waived caseload changed slightly—the share of person offense cases increased while the share of all other offense cases decreased

- The proportion of judicially waived drug offense cases remained stable between 2005 and 2011, with a relative decline through 2014.
- Between 2005 and 2008, the likelihood of waiver for person offense cases increased and then declined through 2011. Following the increase through 2014, the proportion of person offense cases judicially waived was higher than that in 2005.
- Between 2005 and 2014, the proportion of property offense cases that were judicially waived fluctuated, with the likelihood of waiver being slightly higher in 2014 than in 2005.
- After an initial increase between 2005 and 2010, the proportion of judicially waived public order offense cases decreased through 2014 to a level just below that in 2005.
- The proportion of the waived caseload involving person offenses grew between 2005 and 2014. In 2005, person offense cases accounted for 44% of the waived caseload; by 2014, person offense cases were 51% of the waived caseload.
- The proportion of all waived delinquency cases that involved a property offense as the most serious charge was 32% in 2005 and 31% in 2014, and ranged between 30% and 34% over the time period.
- Drug offense cases represented 14% of the judicially waived cases in 2005 and 10% in 2014.
- Between 2005 and 2014, public order offense cases comprised 8% to 11% of the waived caseload.

Age

- In 2014, 1.4% of all petitioned delinquency cases involving juveniles age 16 or older were waived to criminal court, compared with 0.1% of cases involving younger juveniles.
- For both age groups, the probability of waiver remained relatively stable between 2005 and 2014.
- In 2014, the disparity in the use of waiver between youth age 16 or older and their younger counterparts was greatest for cases involving drug or property offense.

Gender

- The proportion of person offense cases judicially waived increased from 1.5% in 2005 to 1.8% in 2014 for males, while the proportion of drug offense cases judicially waived decreased from 1.0% to 0.7%.
- The use of waiver remained relatively stable for all offense types involving females between 2005 and 2014.

Race

- The likelihood of judicial waiver among cases involving white youth was lower in 2014 (0.6%) than in 2005 (0.8%); the pattern was different for cases involving black youth (1.0% in 2014 compared with 0.8% in 2005).
- In 2014, cases involving person offenses were most likely to be waived for youth of all races: 0.8% among white juveniles, 1.8% among black juveniles, 1.4% among Hispanic youth and American Indian juveniles, and 0.9% among Asian juveniles.

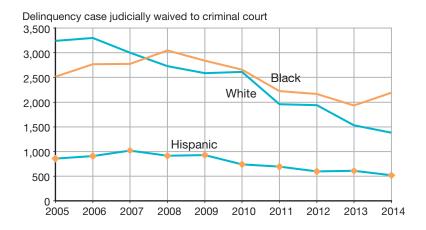

Cases involving juveniles age 16 or older were much more likely to be judicially waived to criminal court than those involving younger juveniles

	Percentage of petitioned cases judicially waived

For white juveniles and Hispanic juveniles, the number of delinquency cases judicially waived to criminal court in 2014 was at its lowest level since 2005

- The number of judicially waived cases involving white youth increased slightly between 2005 and 2006, and then declined 58% to its lowest level (1,400) in 2014. Similarly, the number of judicially waived cases involving Hispanic youth increased 19% between 2005 and 2007, before also decreasing to its lowest level in 2014 (down 49%).
- For black juveniles, the number of judicially waived cases increased 21% between 2005 and 2008, and then fell 37% to its lowest level in 2013 before increasing in 2014.
- The number of judicially waived person offense cases involving white youth decreased 55% between 2005 and 2014.
- The number of judicially waived drug offense cases involving black juveniles decreased substantially between 2005 and 2014—down 70% to its lowest level.

Offense profile of waived cases:

Drugs	14	16	11
Public order	11	8	8
Total	100%	100%	100%

Note: Detail may not total 100% because of rounding. Offense profiles are not presented for American Indian and Asian youth because counts were too small to calculate meaningful percentages.

- In 2014, person offense cases accounted for the largest proportion of judicially waived cases for black juveniles and Hispanic juveniles (59% and 63%, respectively).
- In 2014, property offenses accounted for the largest share of the waived caseload for white youth (40%).

- In 2005, 34% of all delinquency cases resulted in either adjudication of delinquency or waiver to criminal court. This proportion decreased to 30% in 2014.
- In general, the likelihood of being adjudicated delinquent was greater for more serious offenses within the same general offense category.
- Within the 2014 person offense category, 55% of petitioned aggravated assault cases were adjudicated delinquent, compared with 48% of simple assault cases.
- In the property offense category in 2014, similar proportions of petitioned burglary and motor vehicle theft cases were adjudicated delinquent (58% and 60%, respectively), compared with 52% of larceny-theft cases.
- Among public order offenses in 2014, 60% of obstruction of justice cases were adjudicated delinquent, compared with 52% of disorderly conduct cases.
- Youth younger than 16 accounted for 50% of all adjudicated delinquency cases handled by juvenile courts in 2014, females accounted for 22%, and white youth accounted for 41%.

The proportion of formally processed delinquency cases that resulted in a delinquency adjudication or waiver changed little since 2005

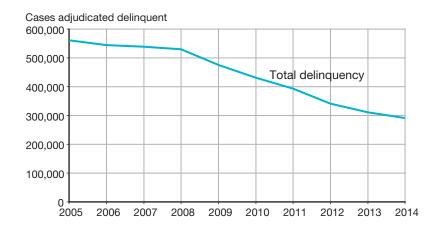

In 2014, youth were adjudicated delinquent in more than half (54%) of petitioned delinquency cases

Note: Detail may not add to totals because of rounding.						

Between 2005 and 2014, the number of cases in which youth were adjudicated delinquent decreased 48%

Since 2005, the number of cases adjudicated delinquent decreased for all general offense categories

- The annual number of delinquency cases in which youth were adjudicated delinquent steadily decreased from 560,600 in 2005 to its lowest level in 2014 (291,300).
- The number of adjudicated property offense cases was at its lowest level in 2014 (from 194,400 in 2005 to 95,700 in 2014).
- The number of adjudicated person offense cases decreased 45% from 141,200 cases in 2005 to 77,500 cases in 2014.
- The decrease in the number of adjudicated cases between 2005 and 2014 was similar for drug and public order offense cases (down 48% and 47%, respectively).

Offense profile of cases adjudicated delinquent:

Person	25%	27%
Property	35	33
Drugs	11	11
Public order	29	29
Total	100%	100%
Cases adjudicated delinquent	560,600	291,300

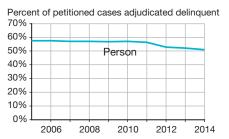

Note: Detail may not total 100% because of rounding.

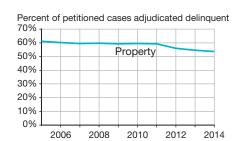

Compared with 2005, the 2014 adjudicated delinquent caseload included a greater proportion of person offense cases, a smaller proportion of property offense cases, and equal proportions of drug and public order offense cases.

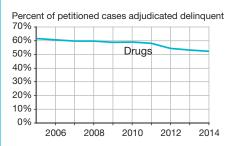

- The likelihood of a delinquency adjudication was less in 2014 than in 2005 for all offense types (by 7 to 10 percentage points).
- Person offense cases were slightly less likely than the other offense categories to result in delinquency adjudication for all years between 2005 and 2014.
- The likelihood of adjudication among cases involving a property offense decreased from 61% to 54% between 2005 and 2014.
- The likelihood of adjudication among drug offense cases followed a similar pattern, decreasing from 62% to 52% between 2005 and 2014.
- Among public order cases, the likelihood of adjudication decreased from 64% to 57% between 2005 and 2014.
- Cases involving public order offenses were slightly more likely than any other offense to result in a delinquency adjudication each year between 2005 and 2014.

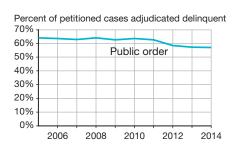

The likelihood of delinquency adjudication decreased from $61\,\%$ of petitioned cases in 2005 to 54% in 2014

Cases involving younger juveniles were slightly more likely to be adjudicated delinquent than those involving older juveniles

Age

- For youth age 15 and younger, person offense cases were less likely than other offense categories to be adjudicated delinquent for each year between 2005 and 2014.
- For drug offense cases involving juveniles age 16 and older, the likelihood of adjudication decreased from 60% to 51% between 2005 and 2014.

Gender

- Between 2005 and 2014, male cases generally were more likely to be adjudicated delinquent than were female cases.
- Petitioned drug offense cases involving females were nearly as likely as those involving males to result in a delinquency adjudication for all years between 2005 and 2014.
- Between 2005 and 2014, for females, the likelihood of a delinquency adjudication decreased for all offense types (between 7 and 12 percentage points).

Race

- Between 2005 and 2014, the likelihood of a delinquency adjudication decreased equally for white youth and black youth (8 percentage points each), the decrease for Hispanic youth was 5 percentage points during the same period.
- Cases involving American Indian juveniles were more likely to result in a delinquency adjudication than cases involving all other races.

Dispositions: Out-of-Home Placement

- The number of cases adjudicated delinquent that resulted in out-ofhome placement decreased 50% from 2005 to its lowest level in 2014.
- Between 2005 and 2014, the number of cases involving the use of out-ofhome placement decreased 60% for drug offense cases, 51% for property offense cases, 48% for public order offense cases, and 47% for person offense cases.
- Public order offense cases include escapes from institutions, weapons offenses, and probation and parole violations. This may help to explain the relatively high number of public order offense cases involving out-ofhome placement.

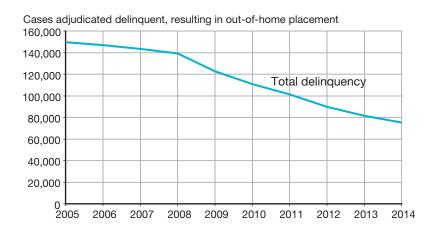

Offense profile of cases adjudicated delinquent, resulting in out-of-home placement:

Most serious offense	2005	2014
Person	27%	29%
Property	33	32
Drugs	9	7
Public order	31	32
Total	100%	100%
Cases resulting in out-of-home placement	149,700	75,400

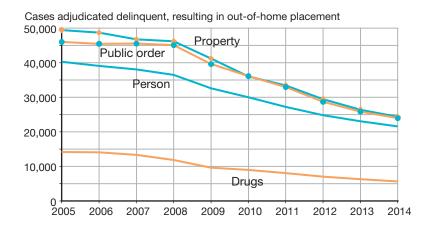

Note: Detail may not total 100% because of rounding.

Property offense cases are the largest share of cases adjudicated delinquent that result in out-of-home placement, although the proportion declined slightly between 2005 and 2014.

The number of cases adjudicated delinquent that resulted in out-of-home placement decreased from 149,700 in 2005 to 75,400 in 2014

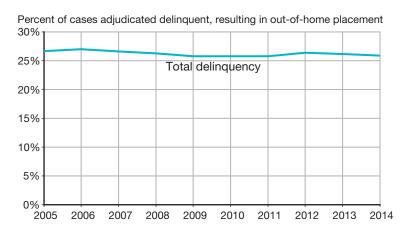

In 2014, the number of cases adjudicated delinquent that resulted in out-of-home place was at its lowest level in all four general offense categories

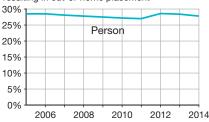

Dispositions: Out-of-Home Placement

The court ordered out-of-home placement in 26% of all cases adjudicated delinquent in 2014

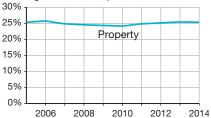

- The proportion of adjudicated delinquency cases that resulted in out-of-home placement was very stable over the period 2005 to 2014, ranging from 27% to 26%.
- The likelihood that an adjudicated case would result in out-of-home placement was also very stable between 2005 and 2014 for person, property, and public order offense cases, changing less than 1 percentage point.
- The proportion of drug offense cases resulting in out-of-home placement declined from 22% in 2005 to 17% in 2014.

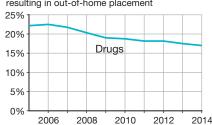

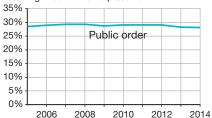

Percent of cases adjudicated delinquent, resulting in out-of-home placement

Percent of cases adjudicated delinquent, resulting in out-of-home placement

Percent of cases adjudicated delinquent, resulting in out-of-home placement

Dispositions: Out-of-Home Placement

Age

- In each year from 2005 through 2014, cases involving juveniles age 16 or older adjudicated delinquent were more likely to result in out-of-home placement than were cases involving youth age 15 or younger, regardless of offense.
- Between 2005 and 2014, the use of out-of-home placement for younger youth remained the same for property offense cases and declined slightly for all other offense types. For older youth, the use of out-ofhome placement remained the same for person and public order offense cases and declined for property and drug offense cases.

Gender

- For males in 2014, person and public order offense cases adjudicated delinquent were most likely to result in out-of-home placement (30% each), followed by property cases (27%), and cases involving drug offenses (17%).
- For females in 2014, adjudicated public order offense cases were most likely to result in out-of-home placement (23%), followed by person cases (21%), property cases (19%), and drug offense cases (15%).

Race

- After adjudication, the likelihood of out-of-home placement in 2014 was greater for Hispanic youth (31%) than for black (28%), American Indian (24%), white (22%), or Asian youth (20%).
- Across offenses, the proportion of cases adjudicated delinquent that resulted in out-of-home placement was smaller in 2014 than in 2005 for all but Hispanic youth. Property and public order offense cases accounted for larger proportions of Hispanic cases resulting in out-of-home placement in 2014 than in 2005.

Between 2005 and 2014, the likelihood of out-of-home placement remained relatively stable

NA: Data are not presented because the small number of cases produces unstable estimates.

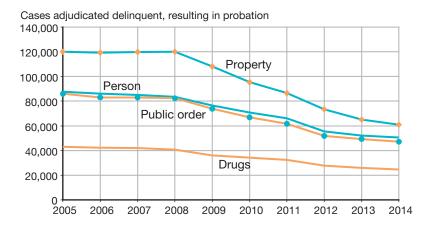

Dispositions: Probation

The number of cases adjudicated delinquent that resulted in probation declined 46% between 2005 and 2014

- Between 2005 and 2014, the number of cases adjudicated delinquent that resulted in an order of probation decreased 46%, compared with a 50% decrease in the number of cases that resulted in out-of-home placement.
- Between 2005 and 2014, the number of cases resulting in probation decreased at a similar pace for all offense groups: 49% for property offenses, 45% for public order offenses, 43% for drug offenses, and 42% for person offenses.

The number of adjudicated property offense cases resulting in an order of probation fell 49% since 2005

Dispositions: Probation

- Probation was the most restrictive disposition used in 63% (183,200) of the cases adjudicated delinquent in 2014, compared with 60% (336,600) of the adjudicated caseload in 2005.
- Between 2005 and 2014, the likelihood of probation for cases adjudicated delinquent was relatively stable for person, property, and public order offense cases, varying by 2 to 3 percentage points, compared with a 7 percentage point range for drug offense cases.

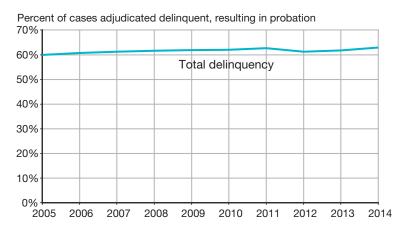

Offense profile of cases adjudicated delinquent, resulting in probation:

Most serious offense	2005	2014
Person	26%	28%
Property	36	33
Drugs	13	13
Public order	26	26
Total	100%	100%
Cases resulting in formal probation	336,600	183,200

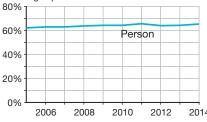

Note: Detail may not total 100% because of rounding.

- In 2014, 33% of cases adjudicated delinquent that resulted in probation involved property offenses, while person cases and public order cases each accounted for approximately one quarter of these cases (28% and 26%, respectively).
- The offense characteristics of cases adjudicated delinquent that resulted in probation changed little between 2005 and 2014, with a slight increase in the proportion of cases involving person offenses, no change in the proportion of cases involving drug or public order offenses, and a slight decrease in the proportion of cases involving property offenses.

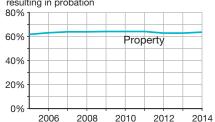

Probation remains the most likely sanction imposed by juvenile courts

Age

- Among juveniles age 15 or younger, the overall likelihood of being placed on formal probation increased between 2005 and 2014 from 63% to 65%.
- Among youth age 16 or older, the overall likelihood of being placed on formal probation also increased between 2005 and 2014, from 57% to 60%.
- For both age groups in 2014, adjudicated cases involving drug offenses were more likely to result in probation than cases in other offense categories.

Gender

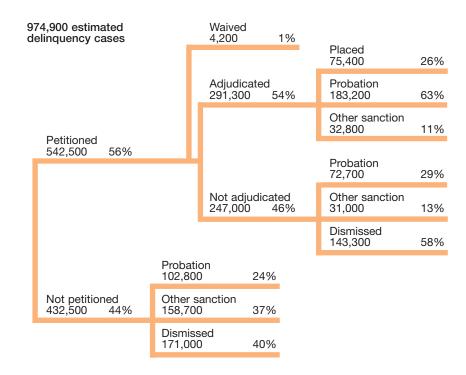

- The overall likelihood of being placed on formal probation increased for females between 2005 and 2014 (from 62% to 66%) and for males (from 60% to 62%).
- For females in 2014, drug offense cases adjudicated delinquent were most likely to be placed on probation (75%), followed by person (71%) and property offense cases (67%). Public order offense cases were least likely to result in formal probation (57%).

Race

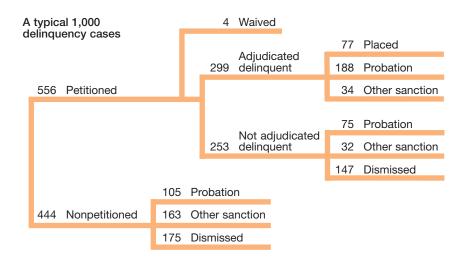

- Between 2005 and 2014, the overall likelihood of being placed on formal probation increased for adjudicated cases involving white youth (from 61% to 64%), black youth (from 58% to 61%), American Indian youth (from 59% to 66%), and Asian youth (from 65% to 72%). For Hispanic youth the likelihood remained the same (62%).
- In 2014, among white youth, drug offense cases that were adjudicated delinquent were most likely to be placed on formal probation (76%), followed by adjudicated person and property offense cases (68% and 65%, respectively) and public order offense cases (55%).

Case Processing Overview, 2014

- In 2014, 56% (542,500) of the estimated 974,900 juvenile court cases were handled formally (with the filing of a petition).
- In 2014, 1% (4,200) of all formally processed delinquency cases were judicially transferred to criminal court.
- In 2014, 54% (291,300) of the cases that were handled formally (with the filing of a petition) resulted in a delinquency adjudication.
- In 63% (183,200) of cases adjudicated delinquent in 2014, formal probation was the most severe sanction ordered by the court.
- In 2014, 26% (75,400) of cases adjudicated delinquent resulted in placement outside the home in a residential facility.
- In 11% (32,800) of cases adjudicated delinquent in 2014, the juvenile was ordered to pay restitution or a fine, to participate in some form of community service, or to enter a treatment or counseling program—dispositions with minimal continuing supervision by probation staff.
- In 46% (247,000) of all petitioned delinquency cases in 2014, the youth was not subsequently adjudicated delinquent. The court dismissed 58% of these cases, while 29% resulted in some form of informal probation and 13% in other voluntary dispositions.
- In 2014, the court dismissed 40% of the informally handled (i.e., nonpetitioned) delinquency cases, while 24% of the cases resulted in voluntary probation and 37% in other dispositions.

Case Processing Overview, 2014

Notes: Cases are categorized by their most severe or restrictive sanction. Detail may not add to totals because of rounding.

- For every 1,000 delinquency cases processed in 2014, 556 were petitioned for formal processing and 444 were handled informally.
- Of the cases that were adjudicated delinquent, 63% (188 of 299) received a disposition of probation and 26% (77 of 299) were placed out of the home.
- In many petitioned delinquency cases that did not result in a delinquency adjudication, the youth agreed to informal services or sanctions (106 of 253), including informal probation and other dispositions such as restitution.
- Although juvenile courts in 2014 handled more than 4 in 10 delinquency cases without the filing of a formal petition, 60% of these cases received some form of court sanction, including probation or other dispositions such as restitution, community service, or referral to another agency.

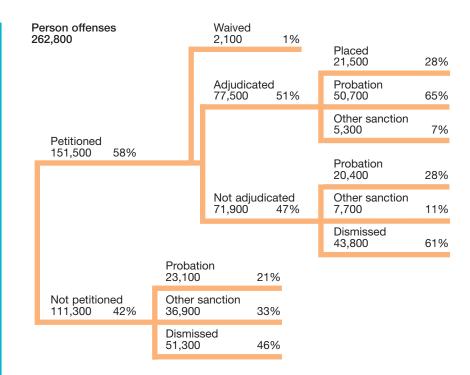

Case Processing by Offense Category, 2014

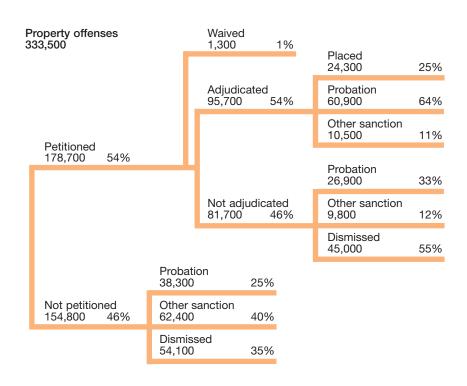

Person Offense Cases

- In 2014, 51% (77,500) of all formally processed person offense cases resulted in a delinquency adjudication.
- Formal probation was the most severe sanction ordered by the court in 65% (50,700) of the adjudicated person offense cases in 2014.
- Once adjudicated, person offense cases were equally likely as public order offense cases to result in outof-home placement (28% each) and more likely than property offenses cases (25%) and drug offense cases (17%).
- In 2014, 21% of person offense cases that were handled informally resulted in probation; 46% were dismissed
- Juvenile courts waived jurisdiction in 1% (2,100) of all petitioned person offense cases in 2014.

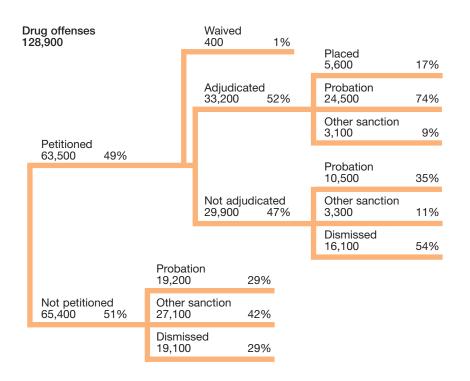

Property Offense Cases

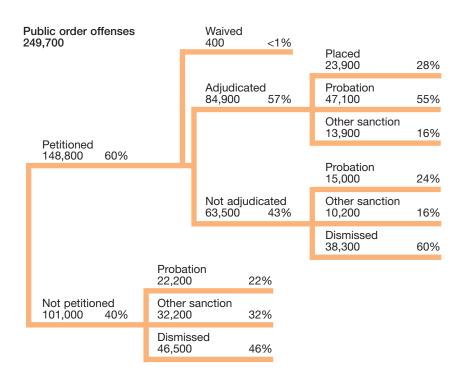

- Juvenile courts handled more than half (54%) of all property offense cases formally in 2014. Of these formally handled cases, 54% (95,700 cases) were adjudicated delinquent.
- In 2014, 60,900 (64%) of the adjudicated property offense cases resulted in probation as the most severe sanction; another 25% (24,300) resulted in out-of-home placement. Other sanctions, such as restitution, community service, or referral to another agency, were ordered in 11% (10,500) of the petitioned property offense cases following adjudication.
- Property offense cases were less likely than person offense cases to be petitioned for formal processing. Once petitioned, however, property offense cases were more likely to result in the youth being adjudicated delinquent than were cases involving person offenses.

Case Processing by Offense Category, 2014

Notes: Cases are categorized by their most severe or restrictive sanction. Detail may not add to totals because of rounding. Annual case processing flow diagrams for 1985 through 2014 are available online at ojjdp.gov/ojstatbb/court/faqs.asp.

Drug Offense Cases

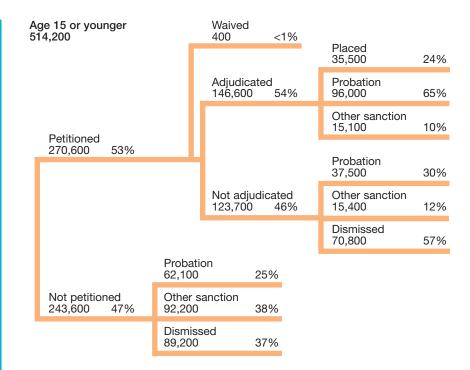

- In 2014, 52% (33,200) of all petitioned drug offense cases resulted in the youth being adjudicated delinquent; 74% (24,500) of these cases received probation as the most severe sanction, and another 17% (5,600) resulted in out-of-home placement.
- Other sanctions, such as restitution, community service, or referral to another agency, were ordered in 9% (3,100) of petitioned drug offense cases following adjudication in 2014.
- Juvenile courts waived jurisdiction in 1% (400) of all petitioned drug offense cases in 2014.
- More than half (51%) of drug offense cases were informally handled in 2014; 71% of the informally handled drug offense cases resulted in probation or some other sanction.

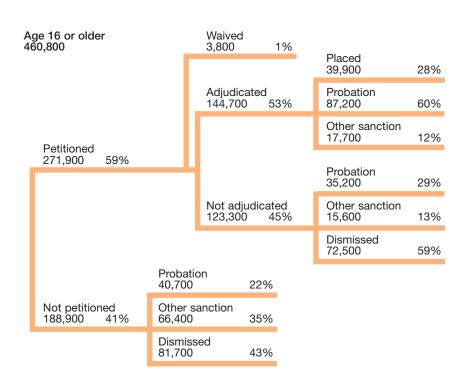

Public Order Offense Cases

- In 2014, the majority (60%) of all public order offense cases were handled formally, with the filing of a petition for adjudication.
- Once adjudicated delinquent, 55% of public order offense cases in 2014 resulted in probation as the most severe sanction, 28% were placed out of the home, and 16% resulted in other sanctions.
- In 2014, 40% of all public order offense cases were handled informally. Of the informal cases, 46% were dismissed, while the remaining cases resulted in some form of court sanction, including probation, restitution, community service, or referral to another agency.

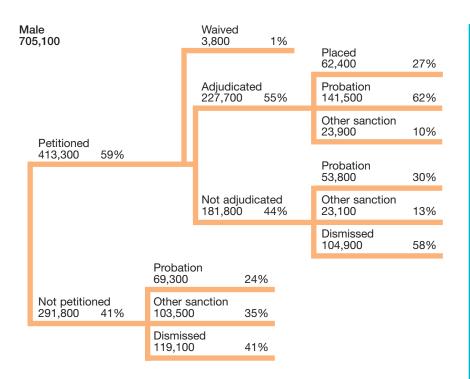

Case Processing by Age, 2014

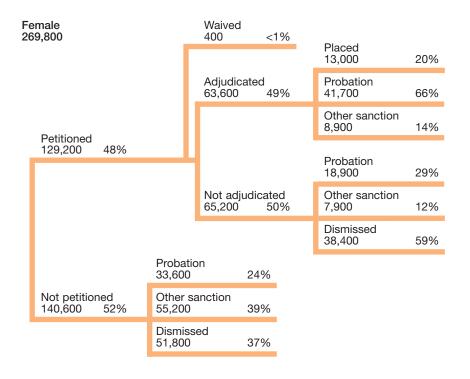

- In 2014, 53% (270,600) of all delinquency cases involving youth age 15 or younger and 59% (271,900) of cases involving youth age 16 or older were handled formally with the filing of a petition.
- Cases involving youth age 15 or younger were adjudicated delinquent in 54% of all formally processed cases in 2014; cases involving youth age 16 or older were adjudicated delinquent in 53% of all such cases.
- The proportion of petitioned cases waived to criminal court in 2014 was less than 1% for youth age 15 or younger, compared with 1% for youth age 16 or older.
- In 2014, 24% of cases adjudicated delinquent involving youth age 15 or younger and 28% of such cases involving youth age 16 or older resulted in out-of-home placement.
- Probation was ordered as the most severe sanction in 2014 in 65% of the adjudicated cases involving youth age 15 or younger, compared with 60% of adjudicated cases involving youth 16 or older.
- Among cases formally adjudicated in 2014, 10% of cases involving youth age 15 or younger and 12% involving youth age 16 or older resulted in other sanctions.
- For youth age 15 or younger, 47% of all delinquency cases were handled informally in 2014; of these cases, 25% resulted in a disposition of probation and 37% were dismissed. Among older youth, 41% of all delinquency cases were handled without the filing of a petition for adjudication in 2014; 22% of these cases resulted in a disposition of probation and 43% were dismissed.

Case Processing by Gender, 2014

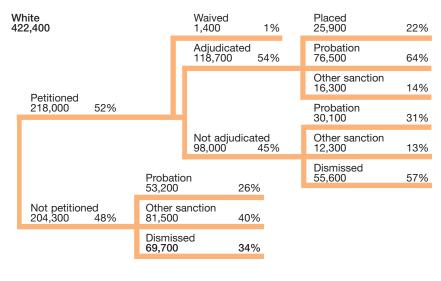

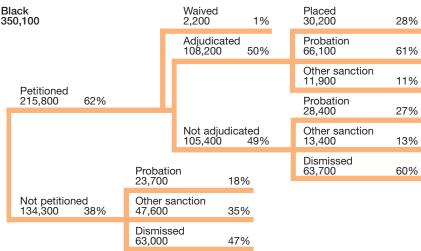

- In 2014, 59% of delinquency cases involving males were handled with the filing of a petition for adjudication, compared with 48% of those involving females.
- Once petitioned, cases involving males in 2014 were more likely to result in a delinquency adjudication than were cases involving females (55% vs. 49%).
- Delinquency cases involving females in 2014 were less likely to be waived to criminal court than those involving males.
- Once adjudicated delinquent, 27% of cases involving males in 2014 resulted in out-of-home placement, compared with 20% of those involving females.
- Of the adjudicated cases involving males, 62% received probation as the most severe sanction, and 10% resulted in other sanctions such as restitution or community service.
- Among adjudicated cases involving females in 2014, 66% received probation as the most severe sanction and 14% resulted in other sanctions.
- Informally handled delinquency cases involving males were equally as likely as those involving females to receive probation in 2014 (24% each); male cases were more likely than female cases to be dismissed (41% vs. 37%).
- In 2014, informally handled delinquency cases involving females were more likely to result in other sanctions than those involving males (39% vs. 35%).

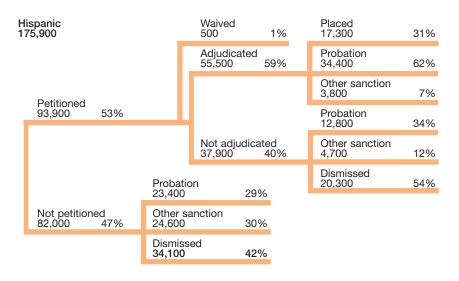

Case Processing by Race, 2014

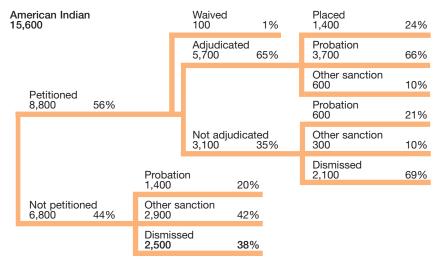

- In 2014, delinquency cases involving white youth were less likely to be handled formally (52%) than those involving black youth (62%), Hispanic youth (53%), American Indian youth (56%), or Asian youth (55%).
- Once petitioned, cases in 2014 involving black youth (50%), white youth (54%), Asian youth (55%), and Hispanic youth (59%) were less likely to be adjudicated delinquent than were cases involving American Indian youth (65%).
- For all racial groups in 2014, about 1% or less of petitioned delinquency cases resulted in waiver to criminal court.
- In 2014, adjudicated delinquency cases involving Hispanic youth were more likely to result in out-of home placement (31%) than cases involving all other races. Black youth were ordered to residential placement in 28% of adjudicated cases. White youth were slightly less likely than American Indian youth to be ordered to residential placement (22% and 24%, respectively). Asian youth were least likely to be ordered to residential placement (20%)
- For adjudicated cases involving black youth in 2014, probation was the most severe sanction ordered in 61% of the cases and 11% resulted in other sanctions.

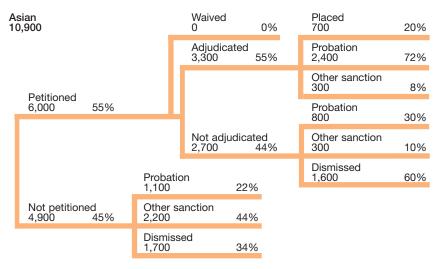

Case Processing by Race, 2014

- For adjudicated cases involving American Indian youth in 2014, probation was the most severe sanction ordered in 66% of the cases and 10% resulted in other sanctions.
- In 72% of the adjudicated cases involving Asian youth in 2014, probation was the most severe sanction; 8% resulted in other sanctions such as restitution or community service.
- In 2014, 48% of delinquency cases involving white youth were handled informally, compared with 38% of cases involving black youth, 47% of cases involving Hispanic youth, 44% of cases involving American Indian youth, and 45% of cases involving Asian juveniles.
- Informally handled delinquency cases involving black youth and Hispanic youth in 2014 were more likely to be dismissed (47% and 42%, respectively) than those involving American Indian youth (38%) or white or Asian youth (34% each).
- In 2014, informally handled delinquency cases involving Asian youth were most likely to result in other sanctions such as restitution, community service, or referral to another agency (44%), compared with cases involving American Indian youth (42%), white youth (40%), black youth (35%), and Hispanic youth (30%).

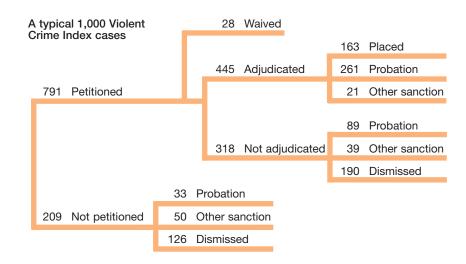

Case Processing by FBI Offense Category, 2014

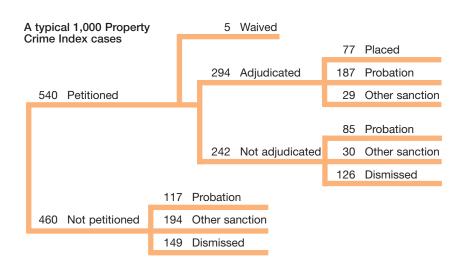

Violent Crime Index Cases

- In 2014, juvenile courts waived 28 of every 1,000 Violent Crime Index offense cases to criminal court.
- Juvenile courts ordered formal sanctions or waived jurisdiction in less than half (473 of 1,000) of Violent Crime Index offense cases handled in 2014.
- Cases involving juveniles adjudicated delinquent for Violent Crime Index offenses in 2014 were more likely to result in out-of-home placement (163 of 1,000) than were Property Crime Index offense cases (77 of 1,000).
- Cases that are not petitioned and cases in which juveniles are not adjudicated delinquent may result in informal sanctions. Thus, juvenile courts imposed some sort of sanction—formal or informal—in 68% (684 of every 1,000) of Violent Crime Index offense cases handled in 2014.

Property Crime Index Cases

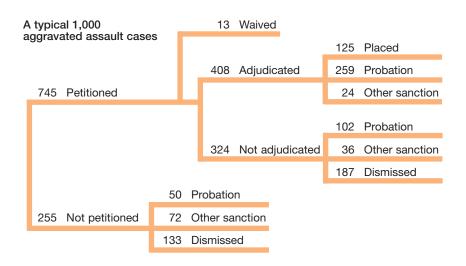

- Juvenile courts waived 5 of every 1,000 Property Crime Index offense cases to criminal court in 2014.
- Cases involving juveniles adjudicated delinquent for Property Crime Index offenses were more likely to result in probation (64%, 187 out of 294) than were Violent Crime Index offense cases (59%, 261 out of 445).
- Juveniles received informal sanctions in 43% (426 of every 1,000) of Property Crime Index offense cases processed in 2014.
- More than 27% of all Property Crime Index offenses referred to juvenile courts in 2014 were ultimately dismissed (275 of 1,000)—23% of the petitioned cases and 32% of those not petitioned.

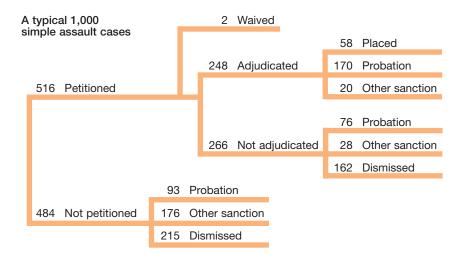

Notes: The Violent Crime Index includes criminal homicide, rape, robbery, and aggravated assault. The Property Crime Index includes burglary, larceny-theft, motor vehicle theft, and arson. Cases are categorized by their most severe or restrictive sanction. Detail may not add to totals because of rounding. Annual case processing flow diagrams for 1985 through 2014 are available online at ojjdp.gov/ojstatbb/court/faqs.asp.

Case Processing by Selected Individual Offense, 2014

Notes: Cases are categorized by their most severe or restrictive sanction. Detail may not add to totals because of rounding. Annual case processing flow diagrams for 1985 through 2014 are available online at ojjdp.gov/ojstatbb/court/faqs.asp.

Aggravated Assault Cases

- Juvenile courts waived 13 of every 1,000 aggravated assault cases to criminal court in 2014, compared with 2 of every 1,000 simple assault cases.
- In 2014, 42% of aggravated assault cases received some formal sanction or were waived to criminal court (421 of 1,000).
- In 2014, 13% of aggravated assault cases received a formal sanction of out-of-home placement (125 of 1,000) and 26% were placed on formal probation (259 of 1,000).
- Of all aggravated assault cases referred to juvenile courts in 2014, 32% were eventually released or dismissed (320 of 1,000)—25% of the petitioned cases and 52% of those that were informally handled.

Simple Assault Cases

- Of every 1,000 simple assault cases handled in 2014, 250 received some formal sanction or were waived to criminal court.
- In 2014, 6% of simple assault cases resulted in the juvenile receiving a formal sanction of out-of-home placement (58 of 1,000) and 17% were placed on formal probation (170 of 1,000).
- Juveniles received informal sanctions in 37% of simple assault cases processed in 2014 (373 of 1,000).
- Of all simple assault cases referred to juvenile courts in 2014, 38% were eventually dismissed (377 of 1,000)—31% of the petitioned cases and 44% of those that were informally handled.

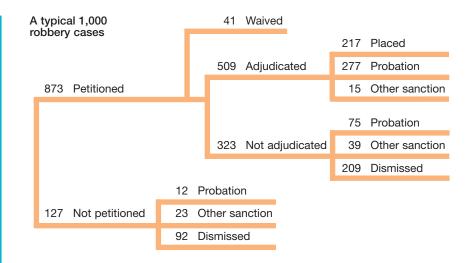

Case Processing by Selected Individual Offense, 2014

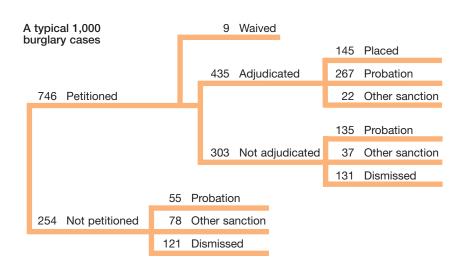

Robbery Cases

- Juvenile courts waived 41 of every 1,000 robbery cases to criminal court in 2014.
- In 2014, juvenile courts ordered formal sanctions or waived jurisdiction in 55% of all robbery cases (550 of 1,000).
- In 2014, 22% of robbery cases received a formal sanction of out-ofhome placement (217 of 1,000) and 28% resulted in formal probation (277 of 1,000).
- Of all robbery cases referred to juvenile court in 2014, 13% were not petitioned; the majority (72%) of these cases were dismissed.

Burglary Cases

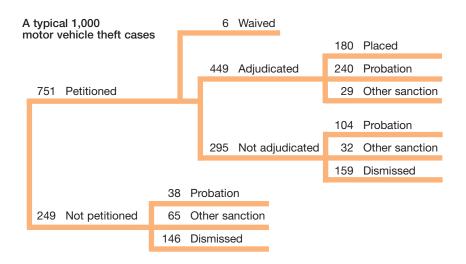

- Juvenile courts waived 9 of every 1,000 burglary cases to criminal court in 2014.
- In 2014, 58% (435 of 746) of all petitioned burglary cases resulted in the youth being adjudicated delinquent.
- Juvenile courts ordered formal sanctions or waived jurisdiction in 60% of all formally handled burglary cases in 2014 (444 of 746).
- In 2014, 145 of 1,000 burglary cases received a formal sanction of out-ofhome placement and 267 of 1,000 resulted in formal probation.
- One-quarter (25%) of all burglary cases referred to juvenile courts in 2014 were handled informally and nearly half of these cases (121 of 254) were dismissed.

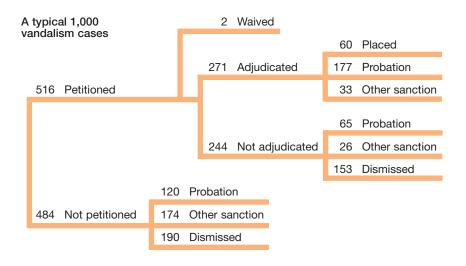

Notes: Cases are categorized by their most severe or restrictive sanction. Detail may not add to totals because of rounding. Annual case processing flow diagrams for 1985 through 2014 are available online at ojjdp.gov/ojstatbb/court/faqs.asp.

Case Processing by Selected Individual Offense, 2014

Notes: Cases are categorized by their most severe or restrictive sanction. Detail may not add to totals because of rounding. Annual case processing flow diagrams for 1985 through 2014 are available online at ojjdp.gov/ojstatbb/court/faqs.asp.

Motor Vehicle Theft Cases

- Juvenile courts waived less than 1% of motor vehicle theft cases to criminal court in 2014 (6 of every 1,000).
- In 2014, nearly half (45%) of motor vehicle theft cases referred to juvenile courts resulted in formal court sanctions or waiver to criminal court.
- About 40% of motor vehicle cases adjudicated delinquent in 2014 resulted in out-of-home placement (180 of 449).
- One-quarter of motor vehicle theft cases referred to juvenile courts in 2014 were handled without the filing of a petition (249 of 1,000).

Vandalism Cases

- Juvenile courts waived 2 of every 1,000 vandalism cases to criminal court in 2014.
- More than half of vandalism cases referred to juvenile courts in 2014 were handled formally (516 of 1,000). Of these cases, 53% were adjudicated delinquent (271 of 516).
- In 2014, 65% of petitioned vandalism cases adjudicated delinquent resulted in a court sanction of probation (177 of 271), and 22% resulted in out-of-home placement (60 of 271).
- Juvenile courts handled 484 of every 1,000 vandalism cases informally (without a petition) in 2014. Youth received informal sanctions in 61% of these nonpetitioned cases.

Chapter 4

National Estimates of Petitioned Status Offense Cases

Status offenses are acts that are illegal only because the persons committing them are of juvenile status. The five major status offense categories used in this report are running away, truancy, curfew law violations, ungovernability (also known as incorrigibility or being beyond the control of one's parents), and underage liquor law violations (e.g., a minor in possession of alcohol, underage drinking). A number of other behaviors, such as those involving tobacco offenses, may be considered status offenses. However, because of the heterogeneity of these miscellaneous offenses, they are not discussed independently in this report but are included in discussions and displays of petitioned status offense totals.

Agencies other than juvenile courts are responsible for processing status offense cases in many jurisdictions. In some communities, for example, family crisis units, county attorneys, and social service agencies have assumed this responsibility. When a juvenile charged with a status offense is referred to juvenile court, the court may divert the juvenile away from the formal justice system to other agencies for service or may decide

to process the juvenile formally with the filing of a petition. The analyses in this report are limited to petitioned cases.

Juvenile courts may adjudicate petitioned status offense cases and may order sanctions such as probation or out-of-home placement. While their cases are being processed, juveniles charged with status offenses are sometimes held in secure detention. (Note that the Juvenile Justice and Delinquency Prevention Act discourages secure detention of status offenders. States holding large numbers of status offenders in secure detention risk losing a significant portion of their juvenile justice block grant awards.)

This chapter presents national estimates of petitioned status offense cases disposed in 2014 and examines trends since 2005, including demographic characteristics of the juveniles involved, types of offenses charged, and the flow of cases as they moved through juvenile court processing. (See chapter 3 for a description of the stages of court processing.)

Counts and Trends

- In 2014, U.S. courts with juvenile jurisdiction petitioned and formally disposed an estimated 100,100 status offense cases.
- The number of petitioned status offense cases processed by juvenile courts decreased 42% between 2005 and 2014.
- The number of petitioned runaway cases processed by juvenile courts decreased 59% between 2005 and 2014 (from 18,700 to 7,700).
- The number of petitioned truancy cases processed by juvenile courts increased 11% between 2005 and 2007 and then declined 29% through 2014.
- Between 2005 and 2007, the number of petitioned curfew cases increased 17% and then declined 56% through 2014 (7,600).
- The number of petitioned ungovernability cases in 2014 (9,200) was 54% below the 2005 level (20,000).
- The number of petitioned liquor law violation cases increased 12% between 2005 and 2007 and then decreased 64% through 2014.

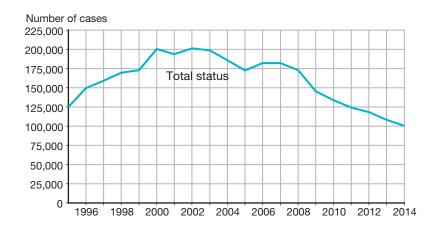

Offense profile of petitioned status offense cases:

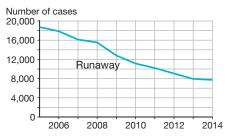

Most serious offense	2005	2014
Runaway	11%	8%
Truancy	39	53
Curfew	9	8
Ungovernability	12	9
Liquor	20	14
Miscellaneous	10	9
Total	100%	100%
Number of cases	172,300	100,100

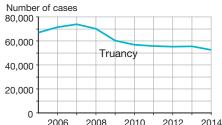

Note: Detail may not total 100% because of rounding.

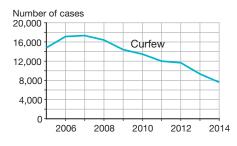

Compared with 2005, a larger proportion of the court's petitioned status offense caseload in 2014 involved truancy and smaller proportions of all other status offenses.

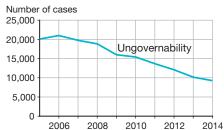

Between 1995 and 2002, the formally handled status offense caseload increased considerably (61%) and then declined 50% through 2014

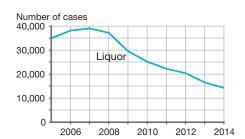

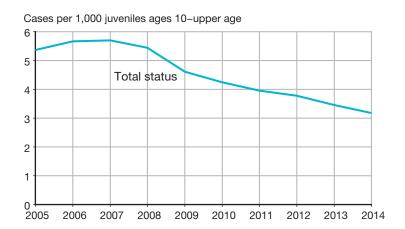

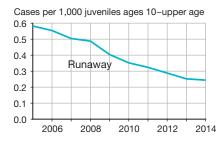

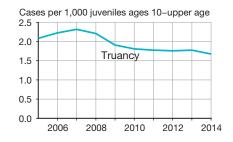

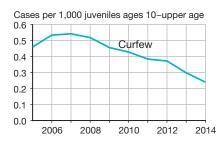

Case Rates

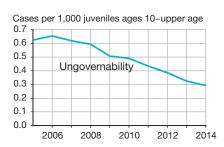

Petitioned status offense case rates decreased from 5.4 to 3.2 per 1,000 juveniles between 2005 and 2014

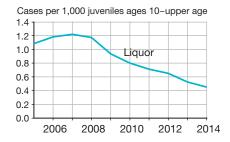

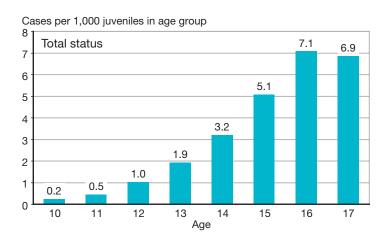

- In 2014, juvenile courts formally processed 3.2 status offense cases for every 1,000 juveniles in the population—those age 10 or older who were under the jurisdiction of a juvenile court.
- The total petitioned status offense case rate decreased 41% between 2005 and 2014.¹
- Between 2005 and 2014, the petitioned runaway case rate decreased 58%.
- The petitioned truancy case rate increased 11% between 2005 and 2007, and then declined 28% through 2014.
- Between 2005 and 2007, the petitioned curfew violation case rate increased 18% and then decreased 56% by 2014.
- The petitioned ungovernability case rate declined 53% between 2005 and 2014.
- The petitioned liquor law violation case rate increased 13% between 2005 and 2007, and then decreased 63% by 2014.

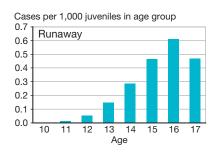

¹ The percent change in the number of cases disposed may not be equal to the percent change in case rates because of the changing size of the juvenile population.

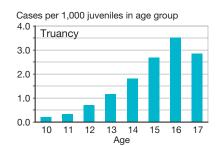

Age at Referral

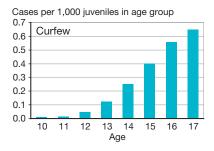

- In 2014, the petitioned status offense case rate for 16-year-olds was more than twice the rate for 14-year-olds, and the rate for 14-year-olds was more than 3 times the rate for 12-year-olds.
- The largest increase in case rates between age 13 and age 17 was for liquor law violations. The case rate for 17-year-old juveniles (1.9) was 24 times the rate for 13-year-olds (0.1).
- Curfew and liquor law violation rates increased continuously with the age of the juvenile. In contrast, rates for petitioned cases involving runaway, truancy, and ungovernability were higher for 16-year-old juveniles than for 17-year-olds.

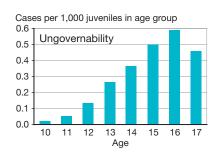

In 2014, status offense case rates increased with the age of the juvenile through age 16 and then decreased slightly for 17-year-olds

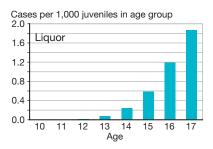

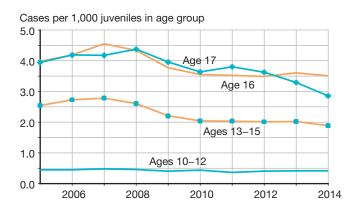

Age at Referral

Trends in case rates differed across age groups for each general status offense category

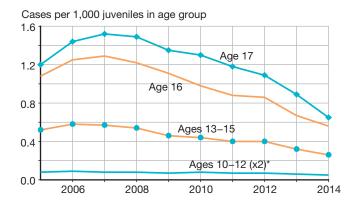

Runaway case rates

Cases per 1,000 juveniles in age group 1.2 Age 16 1.0 Age 17 0.8 0.6 Ages 13-15 0.4 0.2 Ages 10-12 (x2)* 0.0 2006 2008 2010 2012 2014

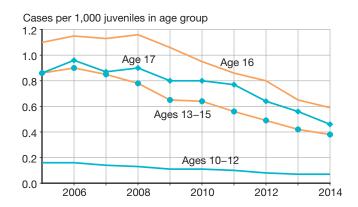

Truancy case rates

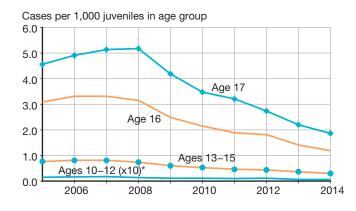

Curfew case rates

Ungovernability case rates

Liquor law violation case rates

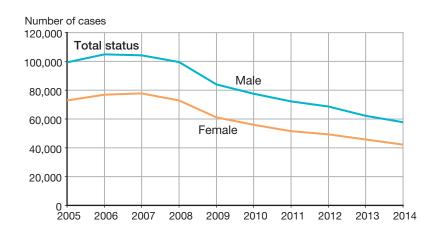

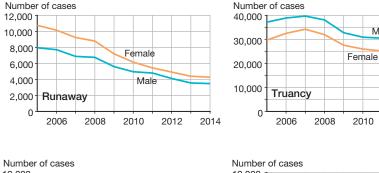

- Case rates for petitioned runaway cases decreased the most for 17-year-olds between 2005 and 2014.
- In 2014, petitioned truancy case rates were at their lowest level since at least 2005 for youth ages 13–15 and those age 17.
- Case rates for petitioned curfew cases increased between 9% and 27% for all youth age 13 and older between 2005 and 2007, before declining through 2014.
- The decrease in case rates between 2005 and 2014 for petitioned ungovernability cases was greater for younger youth than older youth.
- Case rates for petitioned liquor law violation cases grew for older youth between 2005 and 2008, before decreasing through 2014.

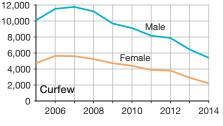

^{*} Because of the relatively low volume of cases involving youth ages 10–12 for runaway, curfew, and liquor law violations, their case rates are inflated by a factor specified in the graph to display the trend over time.

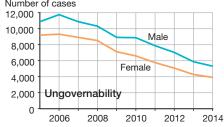

- Overall, the relative decrease in petitioned status offense cases between 2005 and 2014 was equal for males and females (42% each).
- Between 2005 and 2014, the petitioned runaway caseload decreased 57% for males and 60% for females.
- Between 2005 and 2007, the number of petitioned truancy cases increased 7% for males and 15% for females, then decreased through 2014 (28% for males and 30% for females).
- Between 2005 and 2014, the number of petitioned truancy cases outnumbered all other status offense cases for both males and females.

Trends in petitioned status offense caseloads revealed similar patterns for males and females

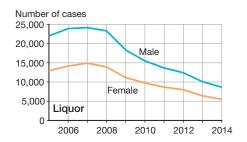

Male

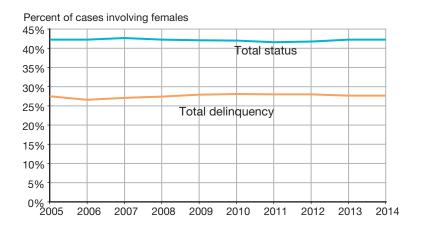

2012

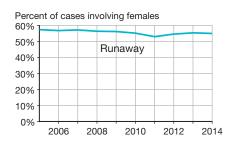

2014

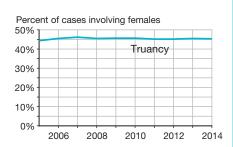

2010

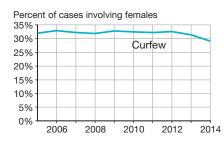

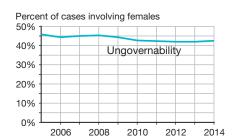

Compared with the delinquency caseload, females accounted for a substantially larger proportion of petitioned status offenses

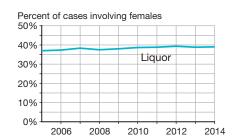

- Males accounted for 58% of the total petitioned status offense caseload in 2014.
- In 2014, males accounted for the majority of curfew (71%), liquor law violation (61%), ungovernability (57%), and truancy (55%) cases.
- Females accounted for 55% of petitioned runaway cases in 2014, the only status offense category in which females represented a larger proportion of the caseload than males.

Offense profile of petitioned status offense cases by gender:

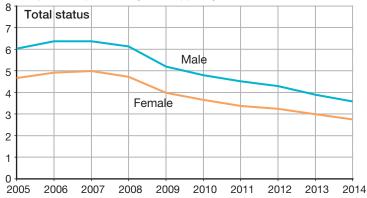

Most serious offense	Male	Female
2014		
Runaway	6%	10%
Truancy	50	57
Curfew	9	5
Ungovernability	9	9
Liquor	15	13
Miscellaneous	11	6
Total	100%	100%
2005		
Runaway	8%	15%
Truancy	37	41
Curfew	10	7
Ungovernability	11	13
Liquor	22	18
Miscellaneous	11	8
Total	100%	100%

Note: Detail may not total 100% because of rounding.

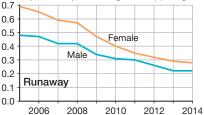

- The petitioned status offense case rate decreased for both males and females between 2005 and 2014 (40% and 41%, respectively).
- Runaway case rates declined between 2005 and 2014 for both males (55%) and females (60%).
- Between 2005 and 2014, the truancy case rate for both males and females was greater than the rate of any other status offense category.
- For both males and females, the case rates for truancy cases increased between 2005 and 2007 (8% and 15%, respectively) before declining through 2014 (26% and 29%, respectively). A similar pattern occurred for curfew cases: male case rates increased 17% and female case rates increased 18% between 2005 and 2007, before declining through 2014 (53% and 60%, respectively).
- Between 2005 and 2014, case rates for ungovernability declined 50% for males and 57% for females.

The petitioned status offense case rates followed similar patterns for males and females between 2005 and 2014

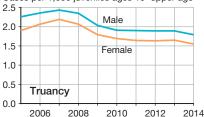

Cases per 1,000 juveniles ages 10-upper age

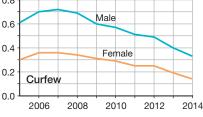

Cases per 1,000 juveniles ages 10-upper age

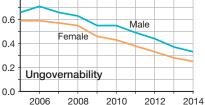

Cases per 1,000 juveniles ages 10-upper age

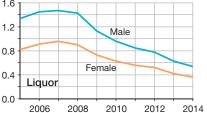

Cases per 1,000 juveniles ages 10-upper age 8.0

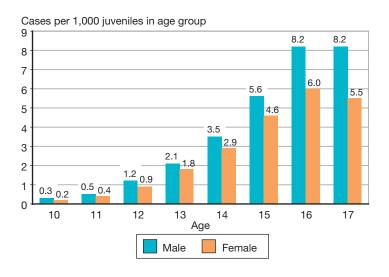

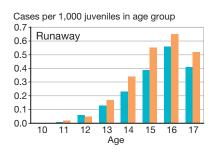

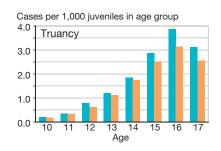

Cases per 1,000 juveniles ages 10-upper age

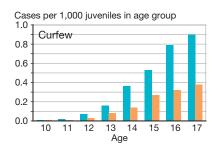

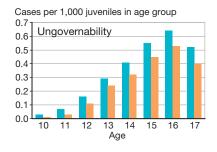

In 2014, the status offense case rate for males increased through age 16 and leveled off for 17-year-olds; for females the rate increased through age 16 and dropped for 17-year-olds

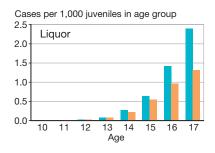

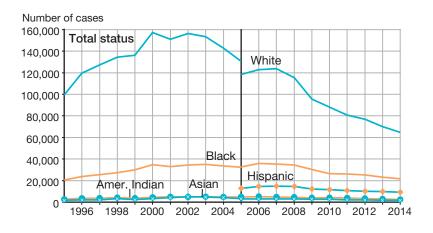

- After age 12, case rates for running away were higher for females than for males in 2014.
- In 2014, petitioned case rates for running away, truancy, and ungovernability peaked at age 16 for both males and females.
- For both males and females, petitioned status offense case rates increased continuously with age for curfew and liquor law violations in 2014.
- In 2014, curfew case rates for males were at least double curfew case rates for females, regardless of age.
- The largest disparity in the ungovernability case rate between males and females was among youth age 10 and 11. The case rate for males age 10 was nearly 4 times the case rate for females age 10, and the case rate for males age 11 was more than double the case rate for females age 11. For each other age category, the male case rate was less than double the female case rate.

- With the release of the 2014 data, detailed race estimates were expanded to include estimates for cases involving Hispanic youth for data years 2005-2014. As a result of this change, race data for the 1995-2004 data period are not comparable with the current reporting period. In previous years, race estimates were developed for four race groups (white, black, American Indian², and Asian³) without consideration of ethnicity; that is, during this data period, persons of Hispanic ethnicity can be of any race and are included within each of the four racial groups. Beginning with the 2005 data year, persons of Hispanic ethnicity are treated as a distinct race group and are excluded from the other four race groups.4
- Since a large proportion of Hispanic youth are white, the estimated number of cases involving white youth is substantially less with the new reporting method. For example, for 2005, the estimated number of status offense cases involving white youth when using the previous method of including Hispanic youth is 130,600, compared with 118,500 cases when using the current method.
- Between 2005 and 2014, across racial groups and offenses, the number of cases decreased.
- In 2014, truancy cases made up the greatest proportion of the caseloads for youth of all race groups.

² The racial classification American Indian (usually abbreviated as Amer. Indian) includes American Indian and Alaskan Native. The method of estimating race was revised beginning with the 2005 data year to detail estimates for cases involving Hispanic youth

The number of petitioned status offense cases decreased more for American Indian youth (47%) than youth of any other race

_	Percent change in number of cases, 2005–2014					
Most serious		American				
offense	White	Black	Hispanic	Indian	Asian

³ The racial classification Asian includes Asian, Native Hawaiian, and Other Pacific Islander.

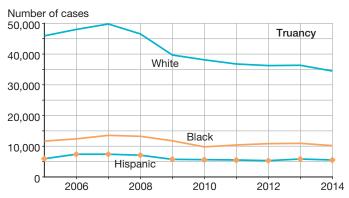

⁴ An important exception must be noted. Data provided to the Archive did not always allow for identification of Hispanic ethnicity for cases involving American Indian youth. Specifically, data from many jurisdictions did not include any means to determine the ethnicity of American Indian youth. Rather than assume ethnicity for these youth, they are classified solely on their racial classification; as such, the American Indian group includes an unknown proportion of Hispanic youth.

Overall, the petitioned status offense caseload has declined for all racial groups over the last 10 years

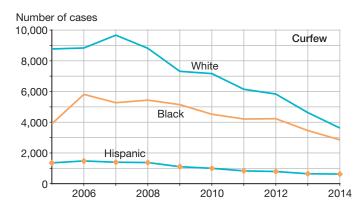

Runaway

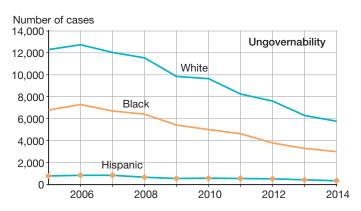

Truancy

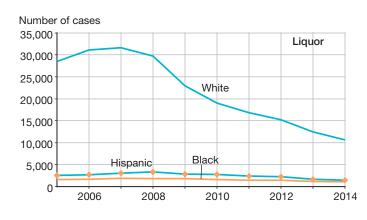

Curfew

Ungovernability

Liquor law violation

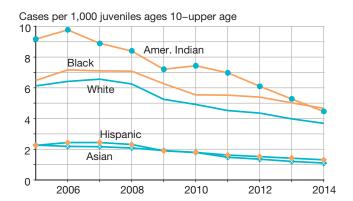

- The petitioned status offense caseload decreased the most for white youth (45%) between 2005 and 2014, followed by black youth (33%), and Hispanic youth (29%).
- The number of petitioned runaway and ungovernability cases decreased by at least half for all three race groups between 2005 and 2014.
- The number of truancy cases remained stable for Hispanic and black youth between 2005 and 2014, and decreased 25% for white youth.
- The decrease in the curfew caseload between 2005 and 2014 was greater for white youth (59%) and Hispanic youth (54%), and smaller for black youth (27%).

Note: Case counts for American Indian and Asian youth are not shown in the offense graphs above because their numbers are too small for display.

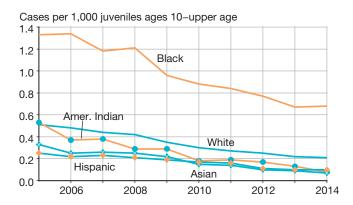

- Between 2005 and 2014, petitioned status offense case rates decreased 52% for Asian youth, 51% for American Indian youth, 42% for Hispanic youth, 40% for white youth, and 28% for black youth.
- For all years between 2005 and 2013, the total petitioned status offense case rate for American Indian youth was higher than that for juveniles of all other racial categories. However, in 2014, the petitioned status offense case rate for black youth was similar to the case rate for American Indian youth, and higher than the case rates for all other racial categories.
- Between 2005 and 2014, the runaway case rate decreased 49% for black youth and 59% each for white youth and Hispanic youth. Despite declines for all racial groups, the runaway case rate for black youth in 2014 was more than 3 times the rate for white youth and more than 6 times the rates for Hispanic youth, American Indian youth, and Asian youth.
- Compared with all other status offense types, truancy case rates decreased the least for all race groups between 2005 and 2014, down 37% for American Indian youth, 34% for Asian youth, 24% for Hispanic youth, 17% for white youth, and 5% for black youth.

Between 2005 and 2014, petitioned status offense case rates decreased for all race groups

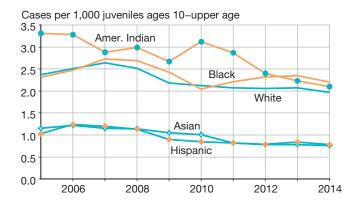

Total status offense case rates

Runaway case rates

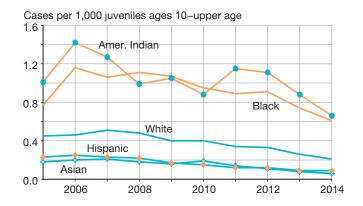

Truancy case rates

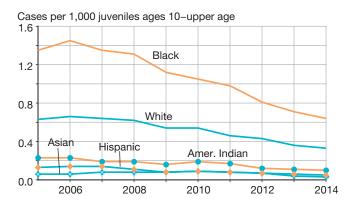

Case rates varied by racial group and offense between 2005 and 2014

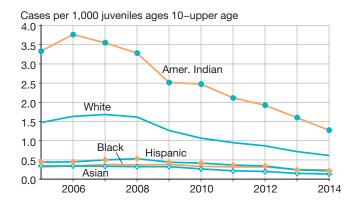

Curfew case rates

Ungovernability case rates

Liquor law violation case rates

- Curfew case rates decreased more for white, Hispanic, and Asian youth (down at least 54% each) than for black or American Indian youth (21% and 35%, respectively) between 2005 and 2014.
- In 2014, the ungovernability case rate for black juveniles was nearly twice the white rate.
- American Indian juveniles had the highest case rate for liquor law violations in each year between 2005 and 2014. In 2014, the liquor law violation case rate for American Indian youth was twice the rate for white youth, and more than 5 times the rates for black youth, Hispanic youth, and Asian youth.

Source of Referral

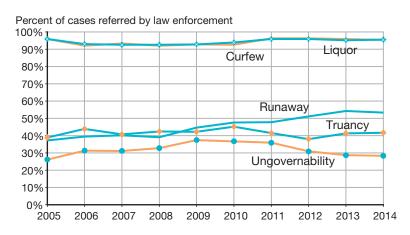

Status offense cases can be referred to court intake by a number of sources, including law enforcement agencies, schools, relatives, social service agencies, and probation officers.

Percentage of petitioned status offense cases referred by law enforcement:

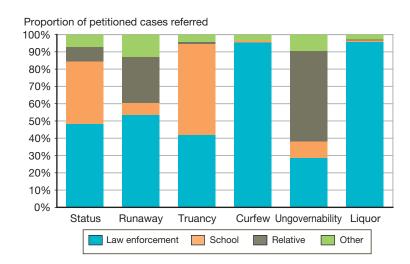

offense	2005	2014
Total status	49%	48%
Runaway	37	53
Truancy	39	42
Curfew	96	95
Ungovernability	26	28
Liquor law	96	96

- In 2014, law enforcement agencies referred nearly half (48%) of the petitioned status offense cases disposed by juvenile courts.
- Compared with 2005, law enforcement referred larger proportions of runaway, truancy, and ungovernability offense cases in 2014.
- Schools referred 53% of the petitioned truancy cases in 2014.
- Relatives referred 52% of the petitioned ungovernability cases in 2014.

Law enforcement agencies are the primary source of referrals to juvenile court for curfew and liquor law violation cases

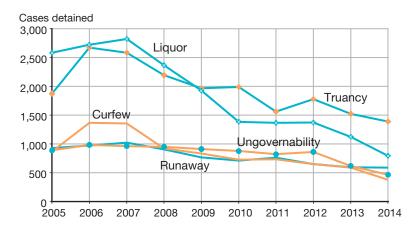

The source of referral in 2014 for petitioned status offense cases varied with the nature of the offense

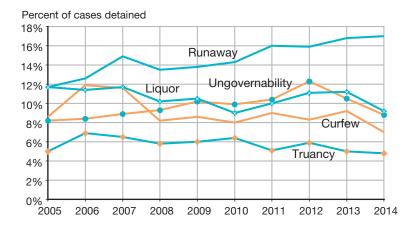

Detention

The number of cases involving detention decreased substantially between 2005 and 2014 for all case types

Between 2005 and 2014, truancy cases were least likely to involve detention, and runaway cases were the most likely

- Between 2007 (a peak year for several offense types) and 2014, the number of petitioned cases involving detention decreased: 72% each for liquor law violations and curfew cases, 52% for ungovernability cases, 46% for truancy cases, and 42% for runaway cases.
- The number of petitioned status offense cases involving detention decreased 50% between 2005 and 2014 (from 8,400 to 4,200).
- Despite the decline in the volume of petitioned status offense cases involving detention, the proportion of cases detained was about the same in 2014 (7%) as in 2005 (8%).
- Between 2005 and 2014, runaway cases were more likely to be detained than any other status offense type.

Offense profile of detained status offense cases:

Most serious		
offense	2005	2014
Runaway	11%	14%
Truancy	22	33
Curfew	10	9
Ungovernability	11	11
Liquor law	31	19
Miscellaneous	15	13
Total	100%	100%
Number of cases	8,400	4,200

Note: Detail may not total 100% because of rounding.

Compared with 2005, the offense characteristics of the 2014 status offense detention caseload involved a greater proportion of runaway and truancy cases, a smaller proportion of curfew and liquor law violation cases, and an equal proportion of ungovernability cases.

Adjudication

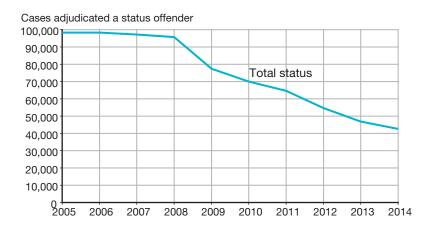

- Between 2005 and 2014, the number of status offense cases in which the youth was adjudicated a status offender decreased from 98,300 to 42,500.
- Between 2005 and 2014, the number of cases in which the youth was adjudicated a status offender decreased for all offense types: runaway (68%), liquor law violation (67%), curfew (60%), ungovernability (53%), and truancy (45%).

Offense profile of cases adjudicated a status offender:

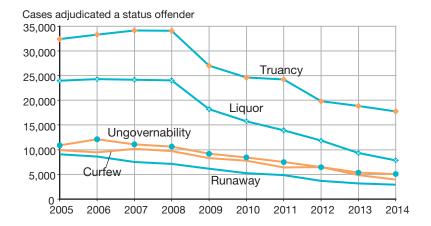

Most serious offense	2005	2014
Runaway	9%	7%
Truancy	33	42
Curfew	10	9
Ungovernability	11	12
Liquor law	24	19
Miscellaneous	12	12
Total	100%	100%
Cases adjudicated a status offender	98,300	47,500

Note: Detail may not total 100% because of rounding.

The adjudicated status offense caseloads for 2005 and 2014 were similar. For both years, cases involving truancy and liquor law violations made up the largest proportions of the adjudicated caseload. Between 2005 and 2008, the number of cases in which the youth was adjudicated a status offender remained stable and then declined 56% through 2014

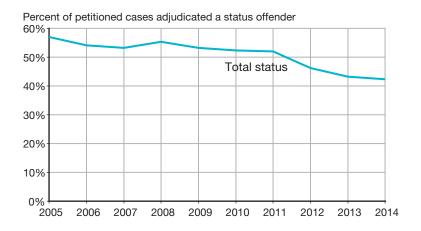

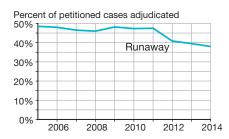

In the past 10 years (2005–2014), the number of cases in which the youth was adjudicated a status offender decreased for all status offense categories

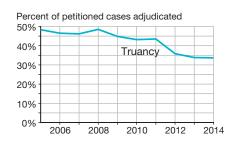

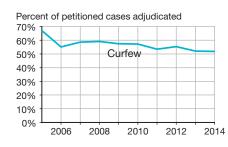

Adjudication

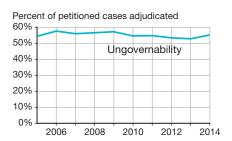

The likelihood of adjudication for petitioned status offense cases decreased from 57% in 2005 to 42% in 2014

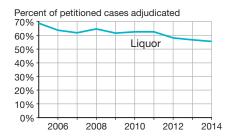

- Among status offense categories in 2014, adjudication was least likely in petitioned truancy cases (34%) and most likely in cases involving ungovernability and liquor law violations (55% each).
- The likelihood of petitioned runaway cases resulting in adjudication decreased from 49% in 2005 to 38% in 2014.
- Between 2005 and 2014, the likelihood of adjudication among petitioned curfew cases decreased from 67% to 52%.
- The likelihood of adjudication among petitioned liquor law violation cases decreased from 69% in 2005 to 55% in 2014.

Percentage of petitioned status offense cases adjudicated, 2014:

Most serious offense	15 or younger	16 or older	Male	Female
Total status	40%	45%	44%	40%
Runaway	39	37	37	39

NA: Too few cases to obtain a reliable percentage.

Dispositions: Out-of-Home Placement

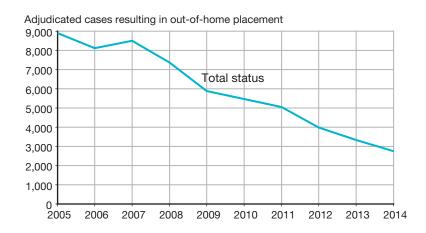

The number of petitioned status offense cases in which youth were adjudicated a status offender and ordered to out-of-home placement declined from 8,900 in 2005 to 2,700 in 2014.

Offense profile of adjudicated status offense cases resulting in out-of-home placement:

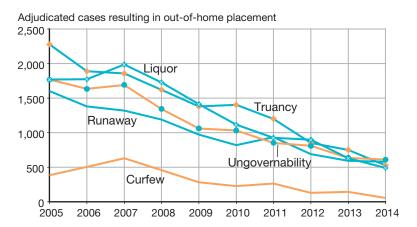

Most serious offense	2005	2014
Runaway	18%	21%
Truancy	26	19
Curfew	4	2
Ungovernability	20	22
Liquor law	20	18
Miscellaneous	12	18
Total	100%	100%
Cases resulting in out-of-home placement	8,900	2,700

Note: Detail may not total 100% because of rounding.

In 2005, truancy cases accounted for the largest share of adjudicated status offense cases that resulted in out-of-home placement; in 2014 ungovernability and runaway cases accounted for the largest shares (22% and 21%, respectively). The number of adjudicated status offense cases resulting in out-of-home placement declined 69% between 2005 and 2014

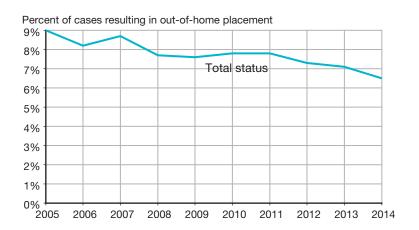

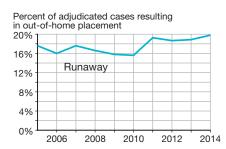

The number of adjudicated status offense cases that resulted in outof-home placement declined between 2005 and 2014 for all offense types

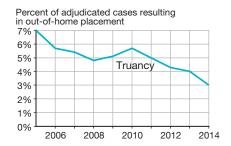

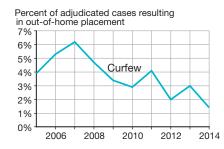

Dispositions: Out-of-Home Placement

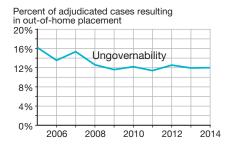

The court ordered out-of-home placement in 6% of all adjudicated status offense cases in 2014

- The likelihood that an adjudicated status offense case would result in out-of-home placement decreased between 2005 and 2014 for all status offense categories except runaway, which increased 2 percentage points.
- Between 2005 and 2014, the largest decline in the proportion of adjudicated status offense cases resulting in out-of-home placement was seen in cases involving truancy and ungovernability (down 4 percentage points each), followed by curfew (down 3 percentage points), and liquor law violations (down 1 percentage point).

Percentage of adjudicated status offense cases resulting in out-of-home placement, 2014:

Most serious	s 15 or	16 or		
offense	younger	older	Male	Female
Total status	7%	6%	6%	6%

Curfew	1	1	3	NA
Ungovern.	14	6	14	NA
Liquor law	5	10	9	13

NA: Too few cases to obtain a reliable percentage.

Dispositions: Probation

- Between 2005 and 2014, the number of adjudicated status offense cases resulting in an order of probation decreased 51%, compared with a 69% decrease in the number of cases resulting in out-of-home placement.
- Between 2005 and 2014, the number of adjudicated status offense cases receiving probation decreased for all offense types: runaway (66%), liquor law violation (61%), curfew (56%), ungovernability (54%), and truancy (37%).

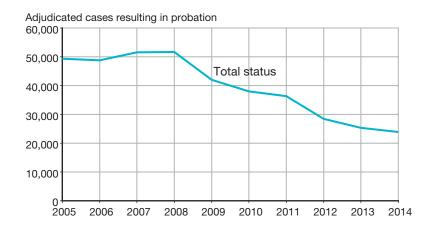

Offense profile of adjudicated status offense cases resulting in probation:

Most serious offense	2005	2014
01101100	2000	2011
Runaway	11%	8%
Truancy	35	45
Curfew	5	4
Ungovernability	16	15

Miscellaneous	8	8
Total	100%	100%
Cases resulting in formal probation	49,300	24,000

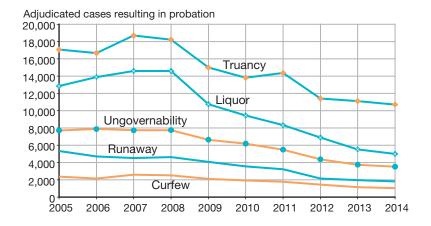

Note: Detail may not total 100% because of rounding.

In 2014, most adjudicated status offense cases that resulted in probation involved truancy offenses (45%), followed by liquor law violations (21%) and ungovernability cases (15%).

Between 2005 and 2008, the number of adjudicated status offense cases that resulted in probation increased 5% and then declined 54% by 2014

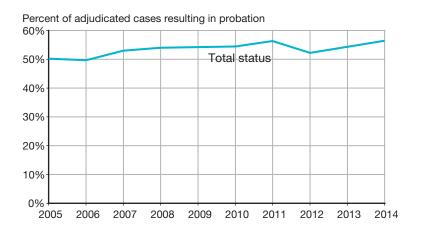

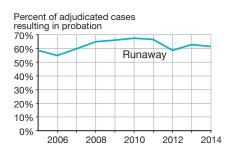

Between 2005 and 2014, the number of adjudicated status offense cases that resulted in probation decreased in all major status offense categories

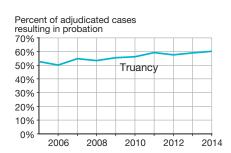

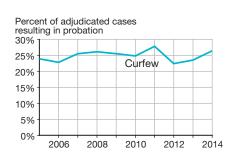

Dispositions: Probation

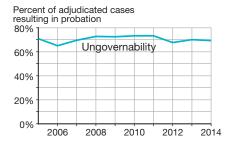

The use of probation as the most restrictive disposition in adjudicated status offense cases increased for all offenses except ungovernability

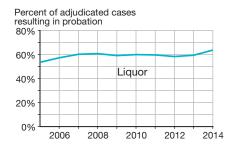

- Probation was the most restrictive disposition used in 56% of the adjudicated status offense cases in 2014, compared with 50% of the adjudicated caseload in 2005.
- In 2014, probation was ordered in 61% of adjudicated runaway cases, 60% of truancy cases, 26% of curfew violations, 69% of ungovernability cases, and 64% of cases involving liquor law violations.

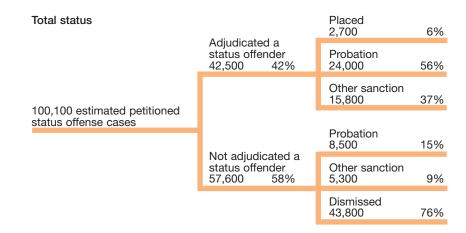

Percentage of adjudicated status offense cases resulting in probation, 2014:

Case Processing Overview, 2014

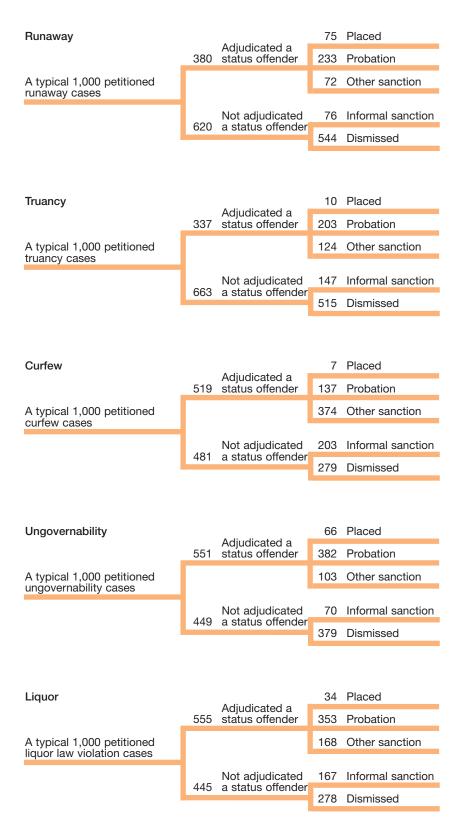

- In 2014, 42% of petitioned status offense cases resulted in adjudication.
- In 56% of adjudicated status offense cases, formal probation was the most restrictive sanction ordered by the court.
- In 2014, 6% of adjudicated status offense cases resulted in out-ofhome placement.
- Dispositions with minimal continuing supervision by probation staff were ordered in 37% of status offense cases adjudicated in 2014—the juvenile was ordered to enter a treatment or counseling program, to pay restitution or a fine, or to participate in some form of community service.
- In 58% of formally handled status offense cases in 2014, the juvenile was not adjudicated a status offender. The court dismissed 76% of these cases, while 15% resulted in some form of informal probation and 9% in other voluntary dispositions.
- For every 1,000 status offense cases formally processed by juvenile courts in 2014, 239 resulted in formal probation and 27 were placed out of the home.

Notes: Cases are categorized by their most severe or restrictive sanction. Detail may not add to totals because of rounding.

Case Processing by Offense Category, 2014

Notes: Cases are categorized by their most severe or restrictive sanction. Detail may not add to totals because of rounding.

Runaway Cases

- Among the five major status offense categories, juvenile courts were most likely to order youth to out-of-home placement following adjudication in runaway cases (75 of 380 cases), but formal probation was a more likely outcome (233 of 380).
- Among petitioned runaway cases in 2014, youth were not adjudicated a status offender in 620 of a typical 1,000 cases. Of these 620 cases, 88% (544) were dismissed.

Truancy Cases

In 2014, of a typical 1,000 formal truancy cases, 203 resulted in formal probation and 10 were placed out of the home.

Curfew Violation Cases

- In 2014, for every 1,000 petitioned curfew violation cases, 137 resulted in formal probation and 7 were placed out of the home.
- Among petitioned cases involving curfew violations in 2014, youth were not adjudicated a status offender in 481 of a typical 1,000 cases. Of these 481 cases, 58% (279) were dismissed.

Ungovernability Cases

For every 1,000 petitioned ungovernability cases in 2014, 382 resulted in formal probation following adjudication and 66 were placed out of the home.

Liquor Law Violation Cases

- Among petitioned liquor law violation cases in 2014, the most likely outcome was formal probation (353 of 1,000); out-of-home placement was ordered in 34 of a typical 1,000 cases.
- In 2014, among petitioned liquor law violation cases, youth were not adjudicated as status offenders in 445 of a typical 1,000 cases.

Appendix A

Methods

The Juvenile Court Statistics (JCS) series uses data provided to the National Juvenile Court Data Archive (the Archive) by state and county agencies responsible for collecting and/or disseminating information on the processing of youth in juvenile courts. These data are not the result of a uniform data collection effort. They are not derived from a complete census of juvenile courts or obtained from a probability sample of courts. The national estimates presented in this Report are developed by using compatible information from all courts that are able to provide data to the Archive.

Sources of Data

The Archive uses data in two forms: detailed case-level data and courtlevel aggregate statistics. Case-level data are usually generated by automated client-tracking systems or case-reporting systems managed by juvenile courts or other juvenile justice agencies. These systems provide detailed data on the characteristics of each delinquency and status offense case handled by courts, generally including the age, gender, and race of the youth referred; the date and source of referral; the offenses charged; detention and petitioning decisions; and the date and type of disposition.

The structure of each case-level data set contributed to the Archive is unique, having been designed to meet the information needs of a particular jurisdiction. Archive staff study the structure and content of each data set in order to design an automated restructuring procedure that will transform each jurisdiction's data into a common case-level format.

Court-level aggregate statistics either are abstracted from the annual reports of state and local courts or are contributed directly to the Archive. Court-level statistics typically provide counts of the delinquency and status offense cases handled by courts in a defined time period (calendar or fiscal year).

Each year, many juvenile courts contribute either detailed data or aggregate statistics to the Archive. However, not all of this information can be used to generate the national estimates contained in JCS. To be used in the development of national estimates, the data must be in a compatible unit of count (i.e., case disposed), the data source must demonstrate a pattern of consistent reporting over time (at least 2 years), and the data file contributed to the Archive must represent a complete count of delinquency and/or status offense cases disposed in a jurisdiction during a given year.

Table A-1: 2014 Stratum Profiles for Delinquency Data

Counties re	portina com	patible data

			Counties reportin			g compandio data		
		_	Number of counties					
Stratum	County population ages 10–17	Counties in stratum	Case- level	Court- level	Total*	Percentage of counties	Percentage of juvenile population	
1	Fewer than 13,531	2,664	1,889	184	2,033	76%	77%	
2	13,531-48,800	334	247	24	259	78	79	
3	48,801-121,000	109	86	8	89	82	82	
4	More than 121,000	35	34	5	34	97	98	
Total		3,142	2,256	221	2,415	77	84	

^{*} Some counties reported both case-level and court-level data; therefore, the total number of counties reporting delinquency data is not equal to the number of counties reporting case-level data plus the number of counties reporting court-level data.

Table A-2: 2014 Stratum Profiles for Status Offense Data

Counties reporting compatible data **Number of counties** County population Counties in Case-Court-Percentage Percentage of Stratum ages 10-17 stratum level level **Total** of counties juvenile population 1 Fewer than 13,531 2.664 1,778 144 1.922 72% 72% 2 13,531-48,800 334 225 12 237 71 72 3 76 109 73 3 70 71 48,801-121,000 94 More than 121,000 35 32 0 32 91 77 Total 3,142 2,108 159 2,267 72

The aggregation of the JCS-compatible standardized case-level data files constitutes the Archive's national case-level database. The compiled data from jurisdictions that contribute only court-level JCS-compatible statistics constitute the national court-level database. Together, these two multijurisdictional databases (case-level and court-level) are used to generate the Archive's national estimates of delinquency and status offense cases.

In 2014, case-level data describing 691,687 delinquency cases handled by 2,256 jurisdictions in 39 states met the Archive's criteria for inclusion in the development of national delinquency estimates. Compatible data were available from Alabama, Alaska, Arizona, Arkansas, California, Colorado, Connecticut, District of Columbia, Florida, Hawaii, Illinois, Iowa, Kentucky, Maryland, Michigan, Minnesota, Missouri, Montana, Nebraska, Nevada, New Jersey, New Mexico, New York, North Carolina, Ohio,

Oklahoma, Oregon, Pennsylvania, Rhode Island, South Carolina, South Dakota, Tennessee, Texas, Utah, Vermont, Virginia, Washington, West Virginia, and Wisconsin. These courts had jurisdiction over 81% of the nation's juvenile population in 2014. Compatible court-level aggregate statistics on an additional 38,591 delinquency cases from 221 jurisdictions were used from Idaho, Illinois, Indiana, New York, and Wyoming. In all, the Archive collected compatible case-level data and court-level statistics on delinquency cases from 2,415 iurisdictions containing 84% of the nation's juvenile population in 2014 (table A-1).

Case-level data describing 67,978 formally handled status offense cases from 2,108 jurisdictions in 37 states met the criteria for inclusion in the sample for 2014. The states included Alabama, Alaska, Arizona, Arkansas, California, Connecticut, District of Columbia, Florida, Hawaii, Illinois, Iowa, Kentucky, Maryland, Michigan,

Minnesota, Missouri, Montana, Nebraska, Nevada, New Jersey, New Mexico, New York, North Carolina, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Tennessee, Texas, Utah, Vermont, Virginia, Washington, West Virginia, and Wisconsin. These courts had jurisdiction over 74% of the juvenile population. An additional 159 jurisdictions in 3 states (Idaho, Indiana, and Wyoming) had compatible court-level aggregate statistics on 4,264 petitioned status offense cases. Altogether, compatible case-level and courtlevel data on petitioned status offense cases were available from 2,267 jurisdictions containing 77% of the U.S. juvenile population in 2014 (table A-2).

A list of states contributing case-level data (either delinquency or petitioned status offense data), the variables each reports, and the percentage of cases containing each variable are presented in table A–3. More information about the reporting sample for

¹ Data from Cook County only.

² Data from Cuyahoga, Franklin, and Hamilton counties only.

the current data year and previous years since 1985 is available online at ojstatbb/ezajcs/pdf/JCSSample.pdf.

Juvenile Population

The volume and characteristics of juvenile court caseloads are partly a function of the size and demographic composition of a jurisdiction's population. Therefore, a critical element in the Archive's development of national estimates is the population of youth that generates the juvenile court referrals in each jurisdiction—i.e., the "juvenile" population of every U.S. county.

A survey of the Archive's case-level data shows that very few delinquency or status offense cases involve youth younger than 10. Therefore, the lower age limit of the juvenile population is set at 10 years for all jurisdictions. On the other hand, the upper age limit varies by state. Every state defines an upper age limit for youth who will come under the original jurisdiction of the juvenile court if they commit an illegal act. (See "Upper age of jurisdiction" in the "Glossary of Terms" section.) Most states set this age to be 17 years; other states have set the age at 15 or 16. States often enact exceptions to this simple age criterion (e.g., offense-specific youthful offender legislation and concurrent jurisdiction or extended jurisdiction provisions). In general, however, juvenile courts have responsibility for all law violations committed by youth whose age does not exceed the upper age of original jurisdiction.

For the purposes of this Report, therefore, the juvenile population is defined as the number of youth living in a jurisdiction who are at least 10 years old but who are not older than the upper age of original juvenile court jurisdiction. For example, in New York, where the upper age of original juvenile court jurisdiction is 15, the juvenile population is the number of youth residing in a county

who have had their 10th birthday but are not older than 15 (e.g., they have not yet reached their 16th birthday).

The juvenile population estimates used in this Report were developed with data from the Census Bureau. The estimates, separated into single-year age groups, reflect the number of white, black, Hispanic, American Indian/Alaskan Native, and Asian (including Native Hawaiian and Pacific Islander) youth ages 10 through the upper age of juvenile court jurisdiction who reside in each county in the nation.

Estimation Procedure

National estimates are developed using the national case-level database, the national court-level data-

National Center for Health Statistics. 2012. Intercensal Estimates of the Resident Population of the United States for July 1, 2000–July 1, 2009, by Year, County, Single-year of Age (0, 1, 2, ..., 85 Years and Over), Bridged Race, Hispanic Origin, and Sex [machine-readable data file]. Prepared under a collaborative arrangement with the U.S. Census Bureau. Available online: cdc.gov/nchs/nvss/bridged_race.htm [Released 10/26/12, following release by the U.S. Census Bureau of the unbridged intercensal estimates by 5-year age group on 10/9/12].

National Center for Health Statistics. 2016. Vintage 2015 Postcensal Estimates of the Resident Population of the United States (April 1, 2010, July 1, 2010–July 1, 2015), by Year, County, Single-year of Age (0, 1, 2, ..., 85 Years and Over), Bridged Race, Hispanic Origin, and Sex [machine-readable data file]. Prepared under a collaborative arrangement with the U.S. Census Bureau. Available online: cdc. gov/nchs/nvss/bridged_race.htm [released on 6/28/16, following release by the U.S. Census Bureau of the unbridged Vintage 2015 postcensal estimates by 5-year age groups.

² In this report, Hispanic ethnicity is handled as a race category, All other racial categories exclude youth of Hispanic ethnicity.

base, and the Archive's juvenile population estimates for every U.S. county. "County" was selected as the unit of aggregation because (1) most juvenile court jurisdictions in the United States are concurrent with county boundaries, (2) most data contributed by juvenile courts identify the county in which the case was handled, and (3) youth population estimates can be developed at the county level.

The Archive's national estimates are generated using data obtained from its nonprobability sample of juvenile courts. There are two major components of the estimation procedure. First, missing values on individual records of the national case-level database are imputed using hot deck procedures. Then the records of the national case-level database are weighted to represent the total number of cases handled by juvenile courts nationwide. Each stage of the estimation procedure will be described separately.

Record-level imputation. The first step in the estimation procedure is to place all U.S. counties into one of four strata based on their youth population ages 10 through 17. The lower and upper population limits of the four strata are defined each year so that each stratum contains one-quarter of the national population of youth ages 10 through 17.

This information is added onto each record in the national case-level database. As a result, each record in the national case-level database contains 11 variables of interest to the *JCS* report: county strata, year of disposition, intake decision, youth's age, youth's gender, youth's race, referral offense, source of referral, case detention, case adjudication, and case disposition.

By definition, the first three of these variables (i.e., county strata, year of disposition, and intake decision) are

¹ County-level intercensal estimates were obtained for the years 2005–2014. The following data files were used:

known for every case in the database. Each of the other variables may be missing for some records and given a missing value code. The estimation procedure for the *JCS* report employs a multistage process to impute information for each missing value on each case record in the national case-level database.

Within a county's set of records in the database there can be two types of missing information: record-level missing and format-level missing. For many counties, a small proportion of their case-level records are missing valid codes in data elements that are valid for most of the other records from that county. For example, the gender of a youth may not have been reported on a few records while it is known for all the other youth in the county's database. This type of missing value is "record-level missing." There are also counties in which every record in the database has a missing value code for a specific variable. For example, some court data collection systems do not capture information on a youth's predisposition detention. Therefore, the variable "case detention" in the national case-level data has a missing value code on each record from that county. This type of missing value is "format-level missing." (Table A-3 indicates the standardized data elements that were not available, i.e., format-missing, from each jurisdiction's 2014 data set.) The imputation process handles the two types of missing values separately.

The imputation of record-level missing values uses a hot deck procedure with a donor pool of records from the same county. First, all the records for a specific county are sorted by disposition date. Then the file is read again, one record at a time. When the imputation software identifies a record with a record-level missing value (i.e., the target record), it imputes a valid code for this target data field. This is accomplished by

locating the next record in the county file that matches the target record on all of its nonmissing values and has a nonmissing code in the target data field; this record is called the donor record. The imputation software copies the valid code from the donor record and replaces the missing value code on the target record with this nonmissing value.

Once a donor record is used in the process for a given variable, it is not used again for that variable unless no other matches can be found for another target record. There are a small number of instances in which no donor record can be found in the county file. When this occurs, the imputation software relaxes its record matching criteria. That is, instead of trying to find a donor record with identical codes on variables other than the target field, the software ignores one nonmissing variable and attempts to find a match on all of the others. In the small number of cases where this does not lead to the identification of a donor record, a second variable is ignored and the file is reread looking for a donor. Although theoretically (and programmatically) this process can be repeated until all variables but county, year of disposition, and intake decision are ignored to find a donor, this never occurred. The order in which variables are removed from the matching criteria are source of referral, detention, offense, adjudication, race, gender, and age.

Format-level imputation. After all the record-level missing values have been imputed, the process turns to format-missing information, or information that is missing from a case record because that court's information system does not report this information on their cases. The process for imputing format-missing information is similar to that used in the record-missing imputation process with the needed difference that the donor pool is expanded. Since all records in a

county are missing the target data, the donor pool for format-missing records is defined as the records from all counties in the target record's stratum with the same year of disposition and intake decision.

Using this expanded donor pool, the imputation process follows the steps described above where a target record (i.e., one with missing data) is identified and the donor pool is scanned for a match. Once a match is found, the missing information on the target record is overwritten and the donor record is flagged as having been used for that variable so it will not be reused for that variable unless all other donors are used. If a donor record cannot be found in the first pass through the donor pool, matching criteria are relaxed until a donor is found.

There is one major exception to this process of imputing format-level missing information. This exception involves the process of imputing missing race for those counties that do not report this data element to the Archive. The racial composition of a court's caseload is strongly related to the racial composition of the resident juvenile population. Creating a donor pool that ignores this relationship would reduce the validity of the imputation process. So for those few data files that did not include race, donor pools were developed that restricted the pool to counties with racial compositions similar to that of the target record's county.

This was accomplished by dividing the counties in the U.S. into four groups defined by the percentage of white juveniles in their age 10–17 populations. This classification was then added to each case record and used as a matching criterion for finding a donor record within the set of potential donor records defined by stratum, year of disposition, and intake decision.

Weighting to produce national esti**mates.** The Archive employs an elaborate multivariate procedure that assigns a weight to each record in the national case-level database that, when used in analysis, yields national estimates of juvenile court activity. The weights incorporate a number of factors related to the size and characteristics of juvenile court case-loads: the size of a community, the age and race composition of its juvenile population, the age and race profile of the youth involved in juvenile court cases, the courts' responses to the cases (intake decision, detention, adjudication, and disposition), and the nature of each court's jurisdictional responsibilities (i.e., upper age of original jurisdiction).

The basic assumption underlying the weighting procedure is that similar legal and demographic factors shape the volume and characteristics of cases in reporting and nonreporting counties of comparable size and features. The weighting procedure develops independent estimates for the number of petitioned delinquency cases, nonpetitioned delinquency cases, and petitioned status offense cases handled by juvenile courts nationwide. Identical statistical procedures are used to develop all case estimates.

As noted earlier, all U.S. counties are placed into one of four strata based on the size of their youth population ages 10 through 17. In the first step to develop the weights, the Archive divides the youth 10-17 population for each stratum into three age groups: 10- through 15-year-olds, 16-year-olds, and 17-year-olds. The three age groups are further subdivided into five racial groups: white, black, Hispanic, American Indian (including Alaskan Native), and Asian (including Native Hawaiian and Other Pacific Islander). Thus, iuvenile resident population estimates are developed for 15 age/race categories in each stratum of counties.

The next step is to identify within each stratum the jurisdictions that contributed to the Archive case-level data consistent with JCS reporting requirements. The populations of these case-level reporting jurisdictions within each stratum are then developed for each of the 15 age/race categories. The national case-level database is summarized to determine within each stratum the number of court cases that involved youth in each of the 15 age/race population groups. Case rates (number of cases per 1,000 juveniles in the population) are then developed for the 15 age/ race groups within each of the four strata.

For example, assume that a total of 2,904,000 white youth ages 10–15 resided in those stratum 2 counties that reported *JCS*-compatible caselevel data to the Archive. If the Archive's case-level database shows that the juvenile courts in these counties handled 22,431 petitioned delinquency cases involving white youth ages 10 through 15, the number of cases per 1,000 white youth ages 10–15 for stratum 2 would be 7.7, or:

 $(22,431 / 2,904,000) \times 1,000 = 7.7$

Comparable analyses are then used to establish the stratum 2 case rates for black youth, Hispanic youth, American Indian youth, and Asian youth in the same age group (36.7, 10.9, 23.8, and 3.1 respectively).

Next, information contained in the national court-level database is introduced, and stratum-level case rates are adjusted accordingly. First, each court-level statistic is disaggregated into the 15 age/race groups. This separation is accomplished by assuming that, for each jurisdiction, the relationships among the stratum's 15 age/race case rates (developed from the case-level data) are paralleled in the court-level data.

For example, assume that a jurisdiction in stratum 2 with an upper age of original juvenile court jurisdiction of 15 reported it processed 500 cases during the year. Also assume that this jurisdiction had a juvenile population of 11,000 white youth, 3,000 black youth, 1,000 Hispanic youth, 200 American Indian youth, and 800 Asian youth. The stratum 2 case rates for each racial group in the 10-15 age group would be multiplied by the corresponding population to develop estimates of the proportion of the court's case-load that came from each age/race group, as follows:

White:

(7.7 x 11,000) / [(7.7 x 11,000) + (36.7 x 3,000) + (10.9 x 1,000)] + (23.8 x 200) + (3.1 x 800) = 39.8%

Black:

(36.7 x 3,000) / [(7.7 x 11,000) + (36.7 x 3,000) + (10.9 x 1,000)] + (23.8 x 200) + (3.1 x 800) = 51.7%

Hispanic:

(10.9 x 1,000) / [(7.7 x 11,000) + (36.7 x 3,000) + (10.9 x 1,000)] + (23.8 x 200) + (3.1 x 800) = 5.1%

American Indian:

(23.8 x 200) / [(7.7 x 11,000) + (36.7 x 3,000) + (10.9 x 1,000)] + (23.8 x 200) + (3.1 x 800) = 2.2%

Asian:

(3.1 x 800) / [(7.7 x 11,000) + (36.7 x 3,000) + (10.9 x 1,000)] + (23.8 x 200) + (3.1 x 800) = 1.2%

The jurisdiction's total caseload of 500 would then be allocated based on these proportions. In this example, it would be estimated that 39.8% of all cases reported in the jurisdiction's aggregate statistics involved white youth, 51.7% involved black youth, 5.1% involved Hispanic youth, 2.2% involved American Indian youth, and the remaining 1.2% involved Asian youth. When these proportions are applied to a reported court-level caseload statistic of 500 cases, this

jurisdiction is estimated to have handled 199 cases involving white youth, 258 cases involving black youth, 26 cases involving Hispanic youth, 11 cases involving American Indian youth, and 6 cases involving Asian youth age 15 or younger.

The same method is used to disaggregate the case counts reported by those jurisdictions that could only report aggregate court-level statistics for jurisdictions with an upper age of 16 (10 age/race groups) and an upper age of 17 (15 age/race groups). The disaggregated court-level counts are then added to the counts developed from case-level data to produce an estimate of the number of cases involving each of the 15 age/race groups handled by reporting courts (i.e., both case-level and court-level reporters) in each of the four strata.

The juvenile population figures for the entire reporting sample are also compiled. Together, these new stratum-specific case counts and juvenile populations for the reporting counties are used to generate a revised set of case rates for each of the 15 age/race groups within each of the four strata.

Stratum estimates for the total number of cases involving each age/race group are then calculated by multiplying the revised case rate for each of the 15 age/race groups in a stratum by the corresponding juvenile population in all counties belonging to that stratum (both reporting and nonreporting).

After the stratum estimates for the total number of cases in each age/race group in each stratum has been calculated, the next step is to weight the records in the national case-level database. This weight is equal to the estimated number of cases in one of the stratum's 15 age/race groups divided by the actual number of such records in the national case-level

database. For example, assume that the Archive generates a national estimate of 16,995 petitioned delinquency cases involving white 16-year-olds from stratum 2 counties. Assume also that the national case-level database for that year contained 12,147 petitioned delinquency cases involving white 16-year-olds from stratum 2 counties. In the Archive's national estimation database, each stratum 2 petitioned delinquency case that involved a white 16-year-old would be weighted by 1.40, because:

16,995 / 12,147 = 1.40

Finally, by incorporating the weights into all analyses of the national case-level database, national estimates of case volumes and case characteristics can be produced. More detailed information about the Archive's national estimation methodology is available on request from the National Center for Juvenile Justice.

Appendix B

Glossary of Terms

Adjudication: Judicial determination (judgment) that a juvenile is or is not responsible for the delinquency or status offense charged in a petition.

Age: Age at the time of referral to juvenile court.

Case rate: Number of cases disposed per 1,000 juveniles in the population. The population base used to calculate the case rate varies. For example, the population base for the male case rate is the total number of male youth age 10 or older under the jurisdiction of the juvenile courts. (See "juvenile population.")

Delinquency: Acts or conduct in violation of criminal law. (See "reason for referral.")

Delinquent act: An act committed by a juvenile which, if committed by an adult, would be a criminal act. The juvenile court has jurisdiction over delinquent acts. Delinquent acts include crimes against persons, crimes against property, drug offenses, and crimes against public order.

Dependency case: Those cases involving neglect or inadequate care on the part of parents or guardians, such as abandonment or desertion; abuse or cruel treatment; improper or inadequate conditions in the home; and insufficient care or support

resulting from death, absence, or physical or mental incapacity of parents/guardians.

Detention: The placement of a youth in a secure facility under court authority at some point between the time of referral to court intake and case disposition. This report does not include detention decisions made by law enforcement officials prior to court referral or those occurring after the disposition of a case.

Disposition: Sanction ordered or treatment plan decided on or initiated in a particular case. Case dispositions are coded into the following categories:

- Waived to criminal court—Cases that were transferred to criminal court as the result of a judicial waiver hearing in juvenile court.
- Placement—Cases in which youth were placed in a residential facility for delinquents or status offenders, or cases in which youth were otherwise removed from their homes and placed elsewhere.
- Probation—Cases in which youth were placed on informal/voluntary or formal/court-ordered supervision.
- Dismissed/released—Cases dismissed or otherwise released (including those warned and counseled) with no further sanction or

consequence anticipated. Among cases handled informally (see "manner of handling"), some cases may be dismissed by the juvenile court because the matter is being handled in another court or agency.

Other—Miscellaneous dispositions not included above. These dispositions include fines, restitution, community service, referrals outside the court for services or treatment programs with minimal or no further court involvement anticipated, and dispositions coded as "other" in a jurisdiction's original data.

Formal handling: See "intake decision."

Informal handling: See "intake decision."

Intake decision: The decision made by juvenile court intake that results in the case either being handled informally at the intake level or being petitioned and scheduled for an adjudicatory or judicial waiver hearing.

- Nonpetitioned (informally handled)—Cases in which duly authorized court personnel, having screened the case, decide not to file a formal petition. Such personnel include judges, referees, probation officers, other officers of the court, and/or agencies statutorily designated to conduct petition screening for the juvenile court.
- Petitioned (formally handled)— Cases that appear on the official court calendar in response to the filing of a petition, complaint, or other legal instrument requesting the court to adjudicate a youth as a delinquent, status offender, or dependent child or to waive jurisdiction and transfer a youth to criminal court for processing as a criminal offender.

Judicial decision: The decision made in response to a petition that asks the

court to adjudicate or judicially waive the youth to criminal court for prosecution as an adult. This decision is generally made by a juvenile court judge or referee.

Judicial disposition: The disposition rendered in a case after the judicial decision has been made.

Juvenile: Youth at or below the upper age of original juvenile court jurisdiction. (See "juvenile population" and "upper age of jurisdiction.")

Juvenile court: Any court that has jurisdiction over matters involving juveniles.

Juvenile population: For delinquency and status offense matters, the juvenile population is defined as the number of children between the age of 10 and the upper age of jurisdiction. For dependency matters, it is defined as the number of children at or below the upper age of jurisdiction. In all states, the upper age of jurisdiction is defined by statute. Thus, when the upper age of jurisdiction is 17, the delinquency and status offense juvenile population is equal to the number of children ages 10 through 17 living within the geographical area serviced by the court. (See "upper age of jurisdiction.")

Nonpetitioned case: See "intake decision."

Petition: A document filed in juvenile court alleging that a juvenile is a delinquent or a status offender and asking that the court assume jurisdiction over the juvenile or that an alleged delinquent be judicially waived to criminal court for prosecution as an adult.

Petitioned case: See "intake decision."

Race: The race of the youth referred, as determined by the youth or by court personnel. In this report,

Hispanic ethnicity is considered a separate race. Each of the other racial categories exclude persons of Hispanic ethnicity. An important exception must be noted. Data provided to the Archive did not always allow for identification of Hispanic ethnicity for cases involving American Indian youth. Specifically, data from many jurisdictions did not include any means to determine the ethnicity of American Indian youth. Rather than assume ethnicity for these youth, they are classified solely on their racial classification; as such, the American Indian group includes an unknown proportion of Hispanic youth.

- White—A person having origins in any of the indigenous peoples of Europe, North Africa, or the Middle East.
- Black—A person having origins in any of the black racial groups of Africa.
- Hispanic—A person of Cuban, Mexican, Puerto Rican, South or Central American, or other Spanish culture or origin regardless of race.
- American Indian—A person having origins in any of the indigenous peoples of North America, including Alaskan Natives.
- **Asian**—A person having origins in any of the original peoples of the Far East, Southeast Asia, the Indian Subcontinent, Hawaii, or any of the other Pacific Islands.

Reason for referral: The most serious offense for which the youth is referred to court intake. Attempts to commit an offense are included under that offense, except attempted murder, which is included in the aggravated assault category.

Crimes against persons—Includes criminal homicide, forcible rape, robbery, aggravated assault, simple assault, and other offenses against persons as defined below.

- **Criminal homicide**—Causing the death of another person without legal justification or excuse. Criminal homicide is a summary category, not a single codified offense. In law, the term embraces all homicides in which the perpetrator intentionally kills someone without legal justification or accidentally kills someone as a consequence of reckless or grossly negligent conduct. It includes all conduct encompassed by the terms murder, nonnegligent (voluntary) manslaughter, negligent (involuntary) manslaughter, and vehicular manslaughter. The term is broader than the Crime Index category used in the Federal Bureau of Investigation's (FBI's) *Uniform* Crime Reports (UCR), in which murder/nonnegligent manslaughter does not include negligent manslaughter or vehicular manslaughter.
- Forcible rape—The carnal knowledge of a person without consent, oral or anal sexual intercourse with another person without consent, or use of an object or instrument to unlawfully penetrate, however slightly, the genital or anal opening of the body of another person without consent, including instances where the victim is incapable of giving consent because of his/her age or because of his/her temporary or permanent mental or physical incapacity. The term is used in the same sense as in the UCR Crime Index. (Other violent sex offenses are classified as "other offenses against persons.") [Note: Effective 2012, the FBI revised the definition of rape to be genderneutral.]
- Robbery—Unlawful taking or attempted taking of property that is in the immediate

- possession of another by force or threat of force. The term is used in the same sense as in the *UCR* Crime Index and includes forcible purse snatching.
- Assault—Unlawful intentional infliction, or attempted or threatened infliction, of injury upon the person of another.
 - Aggravated assault— Unlawful intentional infliction of serious bodily injury or unlawful threat or attempt to inflict bodily injury or death by means of a deadly or dangerous weapon with or without actual infliction of any injury. The term is used in the same sense as in the *UCR* Crime Index. It includes conduct encompassed under the statutory names: aggravated assault and battery, aggravated battery, assault with intent to kill. assault with intent to commit murder or manslaughter, atrocious assault. attempted murder, felonious assault, and assault with a deadly weapon.
 - Simple assault—Unlawful intentional infliction or attempted or threatened infliction of less than serious bodily injury without a deadly or dangerous weapon. The term is used in the same sense as in *UCR* reporting. Simple assault is not often distinctly named in statutes because it encompasses all assaults not explicitly named and defined as serious. Unspecified assaults are classified as "other offenses against persons."
- Other offenses against persons—Includes kidnapping, violent sex acts other than

forcible rape (e.g., incest, sodomy), custody interference, unlawful restraint, false imprisonment, reckless endangerment, harassment, and attempts to commit any such acts.

- Crimes against property— Includes burglary, larceny, motor vehicle theft, arson, vandalism, stolen property offenses, trespassing, and other property offenses as defined below.
 - Burglary—Unlawful entry or attempted entry of any fixed structure, vehicle, or vessel used for regular residence, industry, or business, with or without force, with intent to commit a felony or larceny. The term is used in the same sense as in the UCR Crime Index.
 - ◆ Larceny—Unlawful taking or attempted taking of property (other than a motor vehicle) from the possession of another by stealth, without force and without deceit, with intent to permanently deprive the owner of the property. This term is used in the same sense as in the *UCR* Crime Index. It includes shoplifting and purse snatching without force.
 - Motor vehicle theft—Unlawful taking or attempted taking of a self-propelled road vehicle owned by another with the intent to deprive the owner of it permanently or temporarily. The term is used in the same sense as in the *UCR* Crime Index. It includes joyriding or unauthorized use of a motor vehicle as well as grand theft auto.
 - Arson—Intentional damage or destruction by means of fire or explosion of the property of another without the owner's consent or of any property with intent to defraud, or attempting the above acts. The

- term is used in the same sense as in the *UCR* Crime Index.
- Vandalism—Destroying, damaging, or attempting to destroy or damage public property or the property of another without the owner's consent, except by fire or explosion.
- ◆ Stolen property offenses— Unlawfully and knowingly receiving, buying, distributing, selling, transporting, concealing, or possessing stolen property, or attempting any of the above. The term is used in the same sense as the *UCR* category "stolen property: buying, receiving, possessing."
- Trespassing—Unlawful entry or attempted entry of the property of another with the intent to commit a misdemeanor other than larceny or without intent to commit a crime.
- Other property offenses— Includes extortion and all fraud offenses, such as forgery, counterfeiting, embezzlement, check or credit card fraud, and attempts to commit any such offenses.
- Drug law violations—Includes unlawful sale, purchase, distribution, manufacture, cultivation, transport, possession, or use of a controlled or prohibited substance or drug or drug paraphernalia, or attempt to commit these acts. Sniffing of glue, paint, gasoline, and other inhalants is also included. Hence, the term is broader than the *UCR* category "drug abuse violations."
- Offenses against public order— Includes weapons offenses; nonviolent sex offenses; liquor law violations, not status offenses; disorderly conduct; obstruction of justice; and other offenses against public order as defined below.
 - Weapons offenses—Unlawful sale, distribution, manufacture,

- alteration, transportation, possession, or use of a deadly or dangerous weapon or accessory, or attempt to commit any of these acts. The term is used in the same sense as the *UCR* category "weapons: carrying, possessing, etc."
- Nonviolent sex offenses—All offenses having a sexual element not involving violence. The term combines the meaning of the *UCR* categories "prostitution and commercialized vice" and "sex offenses." It includes offenses such as statutory rape, indecent exposure, prostitution, solicitation, pimping, lewdness, fornication, and adultery.
- Liquor law violations, not status offenses—Being in a public place while intoxicated through consumption of alcohol. It includes public intoxication, drunkenness, and other liquor law violations. It does not include driving under the influence. The term is used in the same sense as the UCR category of the same name. Some states treat public drunkenness of juveniles as a status offense rather than delinquency. Hence, some of these offenses may appear under the status offense code "status liquor law violations." (When a person who is publicly intoxicated performs acts that cause a disturbance, he or she may be charged with disorderly conduct.)
- Disorderly conduct—Unlawful interruption of the peace, quiet, or order of a community, including offenses called disturbing the peace, vagrancy, loitering, unlawful assembly, and riot.
- Obstruction of justice—Intentionally obstructing court or law enforcement efforts in the administration of justice,

- acting in a way calculated to lessen the authority or dignity of the court, failing to obey the lawful order of a court, escaping from confinement, and violating probation or parole. This term includes contempt, perjury, bribery of witnesses, failure to report a crime, and nonviolent resistance of arrest.
- Other offenses against public order—Other offenses against government administration or regulation, such as bribery; violations of laws pertaining to fish and game, gambling, health, hitchhiking, and immigration; and false fire alarms.
- Status offenses—Includes acts or types of conduct that are offenses only when committed or engaged in by a juvenile and that can be adjudicated only by a juvenile court. Although state statutes defining status offenses vary and some states may classify cases involving these offenses as dependency cases, for the purposes of this report the following types of offenses are classified as status offenses:
 - Runaway—Leaving the custody and home of parents, guardians, or custodians without permission and failing to return within a reasonable length of time, in violation of a statute regulating the conduct of youth.
 - Truancy—Violation of a compulsory school attendance law.
 - Curfew violations—Being found in a public place after a specified hour of the evening, usually established in a local ordinance applying only to persons under a specified age.
 - Ungovernability—Being beyond the control of parents, guardians, or custodians or being disobedient of parental authority. This classification is

referred to in various juvenile codes as unruly, unmanageable, and incorrigible.

- Status liquor law violations— Violation of laws regulating the possession, purchase, or consumption of liquor by minors. Some states treat consumption of alcohol and public drunkenness of juveniles as status offenses rather than delinquency. Hence, some of these offenses may appear under this status offense code.
- Miscellaneous status offenses— Numerous status offenses not included above (e.g., tobacco violation and violation of a court order in a status offense proceeding) and those offenses coded as "other" in a jurisdiction's original data.
- Dependency offenses—Includes actions that come to the attention of a juvenile court involving neglect or inadequate care of minors on the part of the parents or guardians, such as abandonment or desertion; abuse or cruel treatment; improper or inadequate conditions in the home; and insufficient care or support resulting from death, absence, or physical or mental incapacity of the parents or guardians.

Offenses may also be grouped into categories commonly used in the FBI's *Uniform Crime Reports*. These groupings are:

 Violent Crime Index—Includes the offenses of murder/nonnegligent manslaughter, forcible rape, robbery, and aggravated assault. Property Crime Index—Includes the offenses of burglary, larcenytheft, motor vehicle theft, and arson.

Source of referral: The agency or individual filing a complaint with intake that initiates court processing.

- Includes metropolitan police, state police, park police, sheriffs, constables, police assigned to the juvenile court for special duty, and all others performing a police function, with the exception of probation officers and officers of the court.
- School—Includes counselors, teachers, principals, attendance officers, and school resource officers.
- Relatives—Includes the youth's own parents, foster parents, adoptive parents, stepparents, grandparents, aunts, uncles, and other legal guardians.
- Other—Includes social agencies, district attorneys, probation officers, victims, other private citizens, and miscellaneous sources of referral often only defined by the code "other" in the original data.

Status offense: Behavior that is considered an offense only when committed by a juvenile (e.g., running away from home). (See "reason for referral.")

Unit of count: A case disposed by a court with juvenile jurisdiction during the calendar year. Each case represents a youth referred to the juvenile

court for a new referral for one or more offenses. (See "reason for referral.") The term disposed means that during the year some definite action was taken or some treatment plan was decided on or initiated. (See "disposition.") Under this definition, a youth could be involved in more than one case during a calendar year.

Upper age of jurisdiction: The oldest age at which a juvenile court has original jurisdiction over an individual for law-violating behavior. For the time period covered by this report, the upper age of jurisdiction was 15 in 2 states (New York and North Carolina) and 16 in 8 states (Georgia, Louisiana, Michigan, Missouri, New Hampshire, South Carolina, Texas, and Wisconsin). In the remaining 40 states and the District of Columbia, the upper age of jurisdiction was 17. It must be noted that within most states, there are exceptions in which youth at or below the state's upper age of jurisdiction can be placed under the original jurisdiction of the adult criminal court. For example, in most states, if a youth of a certain age is charged with an offense from a defined list of "excluded offenses," the case must originate in the adult criminal court. In addition, in a number of states, the district attorney is given the discretion of filing certain cases in either the juvenile court or the criminal court. Therefore, while the upper age of jurisdiction is commonly recognized in all states, there are numerous exceptions to this age criterion.

Waiver: Cases transferred to criminal court as the result of a judicial waiver hearing in juvenile court.
